Ya old news. lol.

I only had \$4 in my account at the time of the closure.

Luckily I exchanged over \$1200 two days before it all went down.

I miss their service, but I think BTC is so much better.

LiquidFiree - April 21, 2016, 9:16 pm

PerfectMoney is the same as LR pretty much. I use it a lot. If you miss LR start using PerfectMoney.

I never used it as a payment method, but the logo brings up some real nostalgia.

They tried (indirectly of course) to be as BTC is today, but without fruition. Their execution was terrible. Ideas are easy; executing them correctly makes or breaks a business.

I remember I had just sold a gamertag on Sythe for \$80 Liberty Reserve, and transferred that for \$90 PayPal. 2 days later, the site got closed down. Lucky me. Sorry for the guy who did the transfer with me for the PayPal. :(

Wasn't the problem not that they had terrible execution, but that the owner of the site was generating money in to his own accounts? Money that shouldn't exist? Correct me if I'm wrong, but I thought that was why they got shut down and the owner arrested.
