Duk. - April 22, 2016, 5:56 am

So after browsing this AliExpress type site I found a lot of cool products and this is one of them. It is a fully functional fake PSP with tons of games. Would be a great gift only fault is the shipping time. Enjoy :) Comment if you guys wanna see more posts like this :P

Not long till Ashens gets something like this and reviews it haha.

It's just a shitty emulator. The games are probably all knock off too. Price isn't too bad though, would be good if you had non-picky kids.

This idea is doable for cheap with the CC sized computers out today.

I've seen the cheaper ones and actually want to get it for shits and giggles.

But just did a 1 minute craigslist search, I could get a modded psp for 35\$ and pick up locally so, 26\$ fake psp is shit lol

AliExpress is what a lot of people use to get cheap shit and resell.

you do realize you can bag yourself a psp for like 5-10\$ local and jb it for free games.

Wish and Geek, one of the best scam sites around.

Products last from 1 minute to 2 hours.

CentralIntelligenceAgency - May 2, 2016, 9:06 am

I'd still preffer buying from Aliexpress than from Wish.

Check this out (same price range):
