Thread: [In the end, we all end up clicking buttons.. or just thinking?](#)

George Jetson - April 22, 2016, 6:34 pm

Once we get passed clicking buttons for a living, what is next? Just thinking?

Imagine.

minimalist - April 22, 2016, 6:36 pm

What are you trying to ask with that question? I'm not following.

SIM-3092053 - April 22, 2016, 6:53 pm

Yeah, I don't understand either, mind elaborating more on this?

dismayed - April 22, 2016, 7:01 pm

How Can Mirrors Be Real If Our Eyes Aren't Real

K?i?K - April 22, 2016, 7:06 pm

When you are alive, you keep clicking. Once you die, you click the Replay Button.

YayHar - April 22, 2016, 7:08 pm

This hit me on a spiritual level.

wtf are on you talking about OP?

1P-LSD - April 22, 2016, 7:16 pm

(Apr 22, 2016 07:01 PM)disma? Wrote: [\[CITE\]](#) How Can Mirrors Be Real If Our Eyes Aren't Reall found this very funny haha.

RepBox - April 22, 2016, 7:18 pm

How can buttons be real if our wombs aren't real?

Autocorrect - April 22, 2016, 7:19 pm

He's asking what comes after we replace everything with computers/robots.

George Jetson - April 22, 2016, 8:10 pm

Once everyone else is liberated from psychical labor and resorting to clicking or tapping buttons -- what is next?

Will we one day literally sit, and THINK? No more button clicking.

Enter the MATRIX!

21st Century Schizoid Man - April 22, 2016, 8:26 pm

in the end

it dosent even matter!

George Jetson - April 22, 2016, 9:06 pm

one you enter the matrix of thought anything can be manifested!

Lorenzo Gucci - April 22, 2016, 9:16 pm

This is a pretty scary thought. The fact that we'll have a such large population yet all physical labour jobs can just be done with robots, what the hell is everyone going to do instead?

George Jetson - April 22, 2016, 9:24 pm

Thought bubbles.

Advanced VR tech.

We will safely travel space from within a thought or VR bubble?

We'll create advanced sophisticated virtual realities?

'Cynical - April 22, 2016, 9:27 pm

Think of it as the people on the ship in Wall-E.

EscapeUnknown - April 22, 2016, 9:28 pm

I didnt get this do I need to pull out the weed?

Copywriter - April 22, 2016, 9:30 pm

Basically OP is saying, after we get rich or something, or the where we're at the point where we sorta have robots do everything for us.... what's next...?

(Apr 22, 2016 09:27 PM)Cynical Wrote: [\[CITE\]](#) Think of it as the people on the ship in Wall-E.
NO WAY, I WAS LITERALLY THINKING THE SAME!!!

George Jetson - April 22, 2016, 9:38 pm

I wonder if we will even dream, since we'll never leave our thought bubbles (we'll all be socially connected through hi tech thought and VR tech).

You'll never have a keyboard or touch anything in the real world for that matter again.

..and if you do it is because of an emergency situation in which case you hate "manually" running your life and can't wait to get back in that secure thought bubble.

Traveling further in time will long be solved thanks to massive thought chains (similar to block chain tech) - imagine the explosion in advancement in anything you could think of -- but literally.

The exchange of information would increase dramatically.

Productivity would be at never before seen high levels - yet no one will be moving except by continuous thought.

Live forever!

xPoutine - April 22, 2016, 9:51 pm

u cant fucking have robots replace humans, it has been tried in war and it fails lol

even with advanced UAVs there still is something called JTACs also known as Joint terminal attack controller, their job is to laser designate targets on the field. There is no way you can replace humans, I don't believe that robots and computers will replace people, ever.

I think we'll just explode in like 300 years, because at this rate of shit and drama in the world we fukt bad

George Jetson - April 22, 2016, 9:57 pm

yeah we just merge with technology through advanced vr thought bubbles bro

yes

?????s??? - April 22, 2016, 11:08 pm

We will be floating brains, capable of anything.

Then, we become being of light and pure vibration.

Prepare yourselves.

George Jetson - April 23, 2016, 3:08 pm

Prepare yourselves.

Maybe generations down the line we will decide for kids to be born straight into the matrix with no ability to travel outside.
