Thread: [\[RELEASE\] EaxClicker - C++ Randomized AutoClicker](#)

3dsboy08 - April 22, 2016, 6:48 pm

Time to ruin the MC community once again, with my new autoclicker, EaxClicker.

EaxClicker is a C++ based autoclicker, which is EXTREMELY hard to detect.

Crappy Video: [www \(dot\) youtube \(dot\) com/watch?v=Ob3ZUyImZ94&feature=youtu.be](http://www.youtube.com/watch?v=Ob3ZUyImZ94&feature=youtu.be)

DL Links/VT's:

Spoiler ([Click to View](#))

DL Link: (base64'd cuz I cant post links):

Code

```
aHR0cHM6Ly9tZWdhLm56LyMhakpZRW1KUIkhTGZsWf0VTdBM0VUWXRvdTUzUGQzTFdqLWdYVnkrRGowcHdfMFNRTzVGZw==VT #1 (base64'd cuz I cant post links):
```

Code

```
aHR0cHM6Ly93d3cudmlydXN0b3RhbC5jb20vZW4vZmlsZS9lNmFkYzhIOGQ4YjNiMzMxNmY2MDMyZWMyYjJiNWl2MDRjNzVkM2EzYjM3NzgyMjhmOWEzMmExZjAwMThhNjYyL2FuYWx5c2lzLzE0NjEzNzU0MTUvVT #2 (base64'd cuz I cant post links):
```

Code

```
aHR0cHM6Ly93d3cudmlydXN0b3RhbC5jb20vZW4vZmlsZS8zODM3OTg3MDZlNjAxZTNkZjVhYjI2YmFmODFjN2ZhZTgxNWM4ZDg5ZTgwN2M3NzhkYjhmOWY0NTI5NGE5NjU4L2FuYWx5c2lzLzE0NjEzNzU0NDQv
```

Instructions to use:

1: Inject EaxClicker32.dll/EaxClicker64.dll depending on if you have 32 bit/64 bit java into javaw.exe. (use Extreme Injector)

2: Enter into the console how many CPS you want the Min. to be. Press ENTER.

3: Enter into the console again, but how many CPS you want the Max. to be. Press ENTER. The console will hide. (You can also close the console if you want to)

4: The keybinds are as follows:

UP - Activate AutoClicker.

DOWN - DeActivate AutoClicker.

NUMLOCK - Self-Destruct AutoClicker.

The clicks are randomized, so have fun <3.

~Made by 3dsboy08!~

NOTE: If I ever release a update for this, the new DL's (since I cannot edit posts after 72 hours), will be at: [github \(dot\) com/ayylmaogitgud/EaxClicker](https://github.com/ayylmaogitgud/EaxClicker)

NOTE: If a higher posting member can fix the links/etc, that would be AWESOME! Thanks.

Fixed all the links ? I might try this out later

elijew - April 22, 2016, 7:08 pm

vouch for this dude. good coder right here.

lurkeryuri - April 22, 2016, 8:51 pm

what the fuck is this shit

use autohotkey or something no need to reinvent the wheel with this "c++ omg best undetecte" garbage

IBUYGUCCI - April 22, 2016, 10:57 pm

You can't be serious, this is a dll that you have to inject? Like come on, is it really that fucking hard to write these lines:

PHP Code

<?php

bool injectIntoProcess(HANDLE hProcess, std::wstring dllName)

```
{  
    std::wstring exeFolder = L"";  
    if (!getCurrentFolder(&exeFolder))  
    {
```

```

    return false;
}

std::wstring dllPath = exeFolder + dllName;
int pathSize = sizeof(wchar_t) * dllPath.size();

FARPROC loadLibraryAddress = GetProcAddress(GetModuleHandle(L"kernel32.dll"),
"LoadLibraryW");

if(loadLibraryAddress == NULL)
{
    return false;
}

LPTHREAD_START_ROUTINE threadStartRoutine = reinterpret_cast<
LPTHREAD_START_ROUTINE>(loadLibraryAddress);

// Allocate space in the process for our <strong class="highlight">DLL</strong>
LPVOID remoteString = VirtualAllocEx(hProcess, NULL, pathSize, MEM_RESERVE |
MEM_COMMIT, PAGE_READWRITE);
if(remoteString == NULL)
{
    return false;
}

// Write the string name of our <strong class="highlight">DLL</strong> in the memory allocated
if (!WriteProcessMemory(hProcess, remoteString, reinterpret_cast<LPCVOID>(&dllPath[0]),
pathSize, NULL))
{
    return false;
}

// Load our DLL
if(CreateRemoteThread(hProcess, NULL, NULL, threadStartRoutine, remoteString, NULL, NULL
) == NULL)
{
    return false;
}

return true;
}

```

I am not a god at C++ so this might not be the most amazing way to do it, but it sure as hell isn't so complicated that you can't distribute an exe that does it for you.

DFayth - April 23, 2016, 2:24 am

Comparing to 7clicker, this requires you to inject it into minecraft with a seperate program, while 7 clicker just needs to open it and go. Heard 7clicker also has right-click feature.

BadboysBro - April 23, 2016, 8:39 am

just plug another mouse into your pc and hire your little brother or mom to click for you while you aim and WASD

Ran - April 23, 2016, 1:52 pm

This'll get detected for many reasons.

IBUYGUCCI - April 24, 2016, 3:50 am

(Apr 23, 2016 08:39 AM)BadboysBro Wrote: [\[CITE\]](#) just plug another mouse into your pc and hire your little brother or mom to click for you while you aim and WASD
This is the bestest advices in the world.

Mindsweep - April 24, 2016, 2:08 pm

I can't even comprehend how fucking stupid this program is lol.

justmatty - April 25, 2016, 9:56 am

Agreed lol. Hardly 'ruining the community' to be honest.

varizeeakainvis - April 27, 2016, 11:36 am

I can't even comprehend how fucking stupid this program is lol.

Barb - April 27, 2016, 11:38 am

(Apr 26, 2016 06:33 PM)Afffsdd Wrote: [\[CITE\]](#) yeah check it out i can make a cpp based autoclicker too ready

```
Code #include <Windows.h>
mouse_event(MOUSEEVENTF_LEFTDOWN, 0, 0, 0, 0);
Sleep(25);
mouse_event(MOUSEEVENTF_LEFTUP, 0, 0, 0, 0);
omg im a genius
```

edit: apparently cloudflare thinks that a fucking sleep() call is trying to sqli
stop trying to sqli you jackass

doot - April 27, 2016, 9:43 pm

I can't even comprehend how fucking stupid this program is lol.

SIM-2212192 - April 27, 2016, 10:01 pm

Nice looking autoclicker op, but why the hell would you do all this injection shit?

cocopuphs - April 27, 2016, 10:09 pm

What's the point of this? I bet the source code is just fucking INSANE and complex as FUCK.

LastSession II - April 29, 2016, 8:07 am

Looks great but anyway to do this without injection?

Fugazy100 - April 29, 2016, 9:41 am

This is awesome keep it going dude!!!!

doot - April 30, 2016, 12:26 am

(Apr 27, 2016 10:01 PM)Ruffian7 Wrote: [\[CITE\]](#) Nice looking autoclicker op, but why the hell would you do all this injection shit?
I know right? "yea let me just inject code into the Java process because I'm too lazy to fucking click on my own"

varizeeakainvis - April 30, 2016, 5:11 am

thanks for leak dode <333333333333

Its not a leak and this isn't Lf gtfo

sikeyessir - October 27, 2023, 4:20 pm

Patched, can you fix?
