Thread: [Hitting Sites or people down for you!](#)

GamersHeaven - April 23, 2016, 2:03 am

I'm not going to lie i saw TheChief's thread and i got inspired to do the same, although i dont have a lot of power so if i can't take down the site don't get mad just use his free service.

All i need is either domain or IP of the website/person you want me too hit offline. Post below with this info.

Doing this for everyone.

I'm not held responsible for anything, this is for educational purpose. (lel).
