Thread: [HAVIJ: I need help on Havij](#)

Roger59 - April 23, 2016, 6:44 pm

Please i need help with Havij, when I'm trying to get the details of the database column it always says(((Trying another method using keyword for finding columns count
Finding columns count for MySQL failed!
Current DB: xxnmms
MySQL error based injection method can be used!))).. is it the dork I'm using is not good or something else. is there a way to by pass this and I will be able to get my columns and tables. Please tell me what can I do please..

Why not sql inject manually? It's much more fun that way.

Lifestyle - April 23, 2016, 8:43 pm

Apparently Havij is shit anyways, try sqlninja (I heard its good)

x - April 23, 2016, 8:49 pm

Manual gives you the best results , never use Havij thats for fuckin rookies

Roger59 - April 24, 2016, 11:05 pm

Please who can teach me or give me just a short tut how to sql inject site manually. Please help please or a video tut or assist via Skype and Teamviewer will be highly appreciated. Thanks.
