Thread: [Need help, confirm to leave page redirect.](#)

Hihhuli - April 24, 2016, 10:03 am

I have downloaded a source online, not so good with html so i cant figure out how to change the destination of the path it redirects me after trying to leave page?

If someone can help me please reply or pm, will give you the source :)

The website source is not using same kind of code and im unable to change the location it redirects.

Could you help me, i can send the source in pm? thanks

I would also want to know if anyone could help with another problem, in the website there's buttons for fb share & twitter etc but on the downloaded version cant see them.?

`<a href="linkhere">Text</a>`

Try it out, it's simple HTML lol
