Thread: [SpeedKick Download Accelerator](#)

CryptoMatic - July 6, 2010, 1:41 pm

Welcome to SpeedKick Download Accelerator.

over the last days i have been working on this download manager/accelerator witch is for premium users on filehosting sites like # or any orther.

download: [#: 1-CLICK Web hosting - Easy Filehosting](#)

Features:

- program is being used from traymenu
- Start all downloads
- Stop all downloads
- Open downloaded files location
- add links
- clear all links
- Premium Login (direct download MUST be enabled)
- multiple downloads (very fast)
- able to download without the loose of browsing speed/video loading (probably the only downloader that is able to do that)
- priority "Real Time"
- tcp optimize for windows xp/vista/7

Speedkick works with all file hosting sites if direct download is enabled and will accelerate your downloads to you the maximum of you internet conenction.

Mmmm, I'm not a big fan of download accelerators, but I must add that this looks quite Impressive, hence I may just give It a crack.

Cheers mate.

Well, It's functionality seems to work as described, and for myself, I'm pleased that It's got no Issues via my Windows 7 x64 o/s.

Thanks.

Can you make one for non prem. users?

CryptoMatic - July 7, 2010, 11:20 pm

sorry dude, it would take way longer to make it for free users, and then it would neither support every site like this do that supports direct download
