Thread: [Userbar and Logo Design](#)

Im looking for a userbar for a group im looking to start. It will start unofficial but hopefully make its way to the official side.

The name is:

The Unknown

Darker style theme; Lots of black, grey, white - I would love a clean userbar. I was thinking for the userbar kinda a moon in the middle with like black stuff on the sides. Kinda like this Spoiler [\(Click to View\)](#) but more spooky and mysterious
