Either you give me 2/4 keywords you need me to check competition on, Monthly search volume & I will dump a list of suggested keywords from the keywords you gave me.

I will do this using both keywords revealer, keywordstool.io & its all premium, legit version so no bullshit!

If you haven't got any keywords, I can generate a list of keyword suggestions but I wont do research on each keyword, so pick 2 - 4 keywords after I generate a list of potential keywords & i'll get back to you with the data.(I obviously need some word to work with, such as "Fitness" or "Clash Royale" etc)

Got lists of keywords on a specific country, and even more. Really nice, thank you.
