Hey guys,

Im wondering about following:

Im seeing a lot of new RAT Programms coming up and I´m wondering what happened to the classics?

- Cybergate?
- Darkcomet?
- Blackshades ?

I havent been active a while in RAT´s... just wondering.

Add:

Which RAT would you go with now (that is free ?)

I knew that.. But what happened to the other ones?

- Cybergate

Most probably outdated

-Darkcomet

The developer (d4ck-c0derc) stopped developing DC few years ago, It haves many glitched and bugs which will end up loosing all your clients

-Blackshades

Its backdoored as far as i know/ seized by FBI

But , be thankful, without those RAT's there would be no (LuminosityLink,Babylon,IMM,etc)
