Thread: [Bought new laptop, what can it run?](#)

Anarchist07 - April 25, 2016, 4:58 am

Hey,

I bought this laptop yesterday:

https://www.amazon.co.uk/gp/product/B01BY8LG0O/ref=oh_aui_detailpage_o00_s00?ie=UTF8&psc=1

Should be coming in very soon (tomorrow tuesday), and I was wondering, what games can this play? Like Black Ops 3 Ultra settings? I'm very curios, as long as it can play games at a decent level haha :P

Thanks

As long as it can on medium I'm happy, I'm mainly gonna be playing CS:GO etc. with it.

You can definitely run cs:go on high with this.

I had a desktop nvidia 730 that could handle max settings 60fps on csgo

I can run CS:GO on a low end laptop with medium settings, I think u can run it easily on high with a constant 60 fps. Good laptop anyway.
