17502 Xbox Stealth Source!

This source was by NGCheats, not many people know about his free working source, might as well let everyone know.

I wouldn't ever sell time with this server since the kv life is very bad, if you're going to host it or anything. I would recommend making it free

even though servers like infernus etc will beat your server within seconds.

don't ever try to sell this source! If you do then you're a low life scammer and you should go and watch porn or something you virgin.

This source has been working as of 26/4/2016

Works perfectly fine for me, and i know the bypasses are out-dated. All NGCheats did was update some of the main files.
