Thread: [\[TUTORIAL\] How to create your own eWhore VERIFICATION images- Illustrator \[TUTORIAL\]](#)

The Drama Llama - April 27, 2016, 12:05 pm

How to create your own eWhore Verification Images using Adobe Illustrator!

What you'll need:

- Adobe Illustrator
- A mobile phone with an Instagram account would be advantageous for higher quality images, but isn't required.

Contents:

1. Intro
2. Where to get Verification templates:
3. How to create a the "Verification Text"
4. Editing the Verification image

1. Intro

In this tutorial, i will be showing you how i've acquired a number of verification pictures and how to edit them to ensure your current "client" is re-assured enough to keep those Amazon Gift Cards flowing :Smile:.

If you go wrong at any point, resizing or editing the wrong image, remember... Ctrl + Z (Undo) is your friend.

An example of one of the verification pics that allowed me to get a \$25 Gift Card.

<https://i.imgur.com/RuWd8jF.jpg>

2. Where to get Verification Templates:

Here you have two options for obtaining the images, Instagram on your Mobile Phone OR Pc. I HIGHLY recommend that you use the mobile method if possible as the images will be much better quality due to resizing issues.

Mobile Phone [\(Click to View\)](#)

Open up the instagram app.

Search for the hashtag #a4challenge.

<https://i.gyazo.com/3bed646252eff6f6d6a2b989c50308ea.jpg>

There are loads of images here that you could use, i'd advise that you go through and save a number of them, that way you can make sure it fits the particular eWhore pack your using at the time. (The one i use at the moment is from that list, its one of the faceless ones).

<https://i.gyazo.com/1973af80c5f069a9db7cf8f41ded00ff.jpg>

To save the image simply take a print screen, then crop the image to make sure its only the girls

image that you save. (do this for each image you wish to save).

Cropped:

<https://i.gyazo.com/f4f197411c11ae711623d31de310d346.jpg>

(I wont upload images for this part for obvious reason but its pretty straight forward)

Open up Facebook messenger and search for yourself in the contacts.

Send yourself all of the screenshots you've just taken.

You can now move back to the PC and download the images you wish to use.

PC ([Click to View](#))

Go to instagram and search for the hashtag #a4challenge.

To save you time i've provided a link below.

Go to -> [Instagram](#)

There are loads of images here that you could use, i'd advise that you go through and save a number of them, that way you can make sure it fits the particular eWhore pack your using at the time. (The one i use at the moment is from that list, its one of the faceless ones).

To save the image , either take a print screen, save it into paint or a simple GFX editor and then save it as a JPG. Alternatively, use [Gyazo](#), to take a screen shot, then just save the image from the web page.

<https://i.gyazo.com/aa5445d7117e3989b81cddd41fd76672.png>

3. How to create a the "Verification Text"

To get a realistic looking handwriting, you're going to want to go to the below website.

[Handwriting Fonts](#)

Select the font "Always Forever".

Font Size: 60

Change the colour to black.

<https://gyazo.com/b8c02e78016d40fdc5189a9eeab46427.png>

Enter whatever the "client" requests, feel free to have some fun with it, just make sure its believable. Writing something like <3 will not look like a heart and will look weird as its not something you would actually write on paper.

My Example:

<https://gyazo.com/c10c797d8865a2e2dacdd8aa57abad7c.png>

Please note i usually have a bit of playful conversation before this where i joke with them about how they don't believe i'm real.

Once you've got the image, right click, save as and pop it somewhere relevant.

Note - These images are saved without a background so you don't have to worry about the colour of the paper on the verification picture.

4. Editing the Verification image

Open Adobe Illustrator.

File -> Open

Navigate to where you've saved the Verification Girl. (Probably Downloads unless you specified elsewhere).

Open the image.

We're now going to set the artboards limits to the outside of your image.

Im going to stress now that if you've used the method of taking a screenshot of the girl on your pc, the quality of the image will be lower than taking a screenshot from your phone due to the images size when being captured.

Go File -> Document Setup.

<https://gyazo.com/a23f971dfdcab6624cecb4eaa7bf5107.png>

You can now drag the edges of the artboard, to the edges of your image.

Try your best to make it as close as possible (Zoom in if you need to using the bottom left corner zoom options).

Once you're finished, press Esc / click in the grey area to the left to release.

File -> Place (Ctrl + Shift + P)

Now navigate to where you saved your Handwriting Text.

When clicking "place" it will allow you to choose the size you want it to be.

Click on your girl and drag it across to set the size of the text.

You now want to spend a bit of time rotating the text and altering the size to ensure it looks believable.

My best advice for this part is to make sure the text aligns with the page.

Once you're happy with the position of the text on the paper, you want to press Esc then click in the grey area on the far left to make sure you have nothing selected.

Now click back on your Verification Text that you've just rotated/resized.

Effect -> Blue -> Gaussian Blur

<https://gyazo.com/966e76cf830695288663894b2774b5d7.png>

Set Radius to 1px.

<https://gyazo.com/12327f4e2fa7a7cf19514c027c614b1d.png>

Feel free Undo-ing and changing the blur but this is what i have found works best and i highly recommend using 1px.

Anything lower doesnt blur enough, anything higher seems to blur too much.

Now we're ready to save the image.

(You may alter the settings for this part (Based on what quality you want), but i'll give you the settings i use.

Go to File -> Export.

Navigate to where you want to save the Verification.

<https://gyazo.com/a9a51c43fde6104e79fb0e98e22811d1.png>

Ensure the file is a JPEG.

I also recommend making sure that the file name is random numbers and letters like photos usually are.

If the user attempts to look at the details of the message or depending on how you send them the image, they may see what its called.

You don't want them seeing something like "eWhoreVerification.JPG".... Just a friendly Tip :Smile:

Now hit Export.

Follow the settings in the image below and hit ok.

<https://gyazo.com/e5f8e731c9d491d30ad94933a04faba6.png>

Feel free to change these settings as you like, they are just the ones i found that work so kept em that way.

Thats it.

You now have a verification picture that you can either send to yourself on facebook messenger like we did before, store it on dropbox / google drive if you're eWhoring on your phone or if you're using kik on bluestacks, you can just navigate to the image and send it like you would any other live pic (I use fake camera).

I hope you enjoyed my tutorial! :Blackhat:

If you have any questions, comments, suggestions or feedback, please feel free to drop em in the thread below!

Pittinger - April 27, 2016, 12:57 pm

Very nice! People have been asking me for this. Great job man.

alphabetor - April 27, 2016, 1:17 pm

Very in depth tutorial and very well formatted. Thanks alot!

TwoStepCloser - April 27, 2016, 1:20 pm

Amazing tutorial, thanks for helping us Llama :D

SIM-3100374 - April 27, 2016, 1:45 pm

Thanks for the tutorial I just use gimp but I guess this is okay!

SocialMediaBooster - April 27, 2016, 2:13 pm

Thank you man for that tutorial , HQ user right here

xLelouch - April 27, 2016, 3:55 pm

HQ tutorial. It will help many new members

NatWest - April 27, 2016, 3:58 pm

Thanks for this OP, very high quality!

Sawbreena - April 27, 2016, 6:26 pm

This is fantastic! Thank you

w0lfxyz - April 27, 2016, 6:36 pm

Why illustrator and not photoshop?

backtrack-5 R3 - April 28, 2016, 12:45 am

Very Nice tutorial thanks OP!

The Drama Llama - April 28, 2016, 1:38 am

Glad you guys like it, any questions, just post em below ?

(Apr 27, 2016 06:36 PM)108ricky Wrote: [\[CITE\]](#) Why illustrator and not photoshop?I use illustrator

because it does pretty much the same thing. You can use either photoshop or illustrstor. Just personal preference really. [/b]

SocialMediaBooster - April 28, 2016, 2:50 pm

Bumping this because this needs more attention

The Drama Llama - April 28, 2016, 5:19 pm

Glad you like it :)

Jessicaxoxo - April 29, 2016, 9:27 am

isn't illustrator a paid software?

you could always use GIMP aswell.

G0SU - April 29, 2016, 11:16 am

Thank you! Will be in use.

The Drama Llama - April 29, 2016, 10:53 pm

(Apr 29, 2016 09:27 AM)Jessicaxoxo Wrote: [\[CITE\]](#) isn't illustrator a paid software?

you could always use GIMP aswell.GIMP is always a possibility, but at the end of the day... i dont think you'll find many people on here who've paid for illustrator ;)

Thanks for the reply, Enjoy ?

sevv - April 30, 2016, 3:25 pm

Thank you - I am using this tutorial but with Photoshop instead. Everyone needs to see this.

Mr Chow - April 30, 2016, 3:35 pm

Every e-whorer should know how to do this. Thanks!

Danny Khalifa - April 30, 2016, 3:37 pm

Amazing tutorial.

Thanks OP!

The Drama Llama - May 1, 2016, 1:54 pm

You're welcome guys ?

Any questions, let me know!

Wings of Redemption - May 3, 2016, 10:21 pm

worked wonders man.

the guy wanted me to hold 3 fingers but i said i will write your name and he said that i was real lol

Haha grats buddy :)

Glad it helped you secure some cash ?

skoogga - May 4, 2016, 7:16 pm

Nice tutorial but there is alot more that can be done to make it more believable. What could really add to this is if you teach how to photoshop a blank paper onto the pic, hard but doable haha.

The Drama Llama - June 5, 2016, 6:12 pm

I've made a fair bit from doing this, and as people have stated above, its worked for them so i'll stick to this for now ?

Gonna do a bit of EW later on tonight, if anyone needs a hand with the verification pics, let me know. ?

Alluro - June 5, 2016, 6:58 pm

Very useful thread thanks alot mate :)

daztani - June 6, 2016, 4:42 pm

great tutorial. thanks for this

Khazri - June 6, 2016, 5:03 pm

This is a really nice tutorial, this can help me and a lot of other users out. Great tutorial for beginners, thanks OP! :BLACKHAT:

The Drama Llama - June 14, 2016, 5:27 pm

Glad you like the tutorial peeps, GL ewhoring ?

Im looking at making another one for photoshop in the near future (as a few have requested info on using a different graphic editor).

Hundred Bands - June 18, 2016, 8:20 pm

Thanks man, have been trying to find out all day.

xphstakhs - June 18, 2016, 8:43 pm

Great post. Helped alot

Thank you

beginwithme - June 23, 2016, 1:22 pm

Thank you Very Much :) I will try that :)

lilspook - March 14, 2017, 4:38 pm

Very nice man, this helped a lot!

scream42 - March 19, 2017, 2:08 pm

quality is so high thank you so much man

JawnStockton - August 7, 2018, 7:01 pm

Great tutorial. I was in a hurry to make one and this came in handy!

sasiad - January 27, 2019, 12:05 pm

Thanks for help :) ! I really appreciate that ;)

mike42 - January 28, 2019, 11:55 am

Really great tutorial bro. <3

darkvas - January 28, 2019, 12:46 pm

this is a very awesome work... Thank you :)

SH4D0WV0RT3X - May 6, 2019, 3:45 pm

This is golden, just what I needed, thanks so much! ?

dinomil - May 6, 2019, 6:52 pm

Love illustrator compared to PS

Eiiimiiia - May 27, 2019, 2:09 am

Great tutorial, thanks a lot!

Maryharr - June 10, 2019, 7:07 pm

Thanks a lot! Your tutorial is the thing I really need!

FluffyNeko - June 12, 2019, 10:56 am

Great job bro, help me fake verif

buccaneer-Finger - June 13, 2019, 5:19 pm

Great job man this really helped the newbies to ewhoring

penix1 - June 22, 2019, 6:06 pm

tyyyyyy so much it helps !!!!!!!!!!!

Last1g - June 22, 2019, 10:15 pm

Thanks man for the help ...

Mandyholew - July 19, 2019, 12:29 pm

Thanks, this is very useful information

xuc.v - September 29, 2019, 8:57 pm

im a nob i dont even know how to do anything i opened photoshop app and it all looked complicated if anyone can help me my snap is itsaro1

Ant95xx - September 30, 2019, 8:15 am

Thank you very much for this, a gold mine for a noob like me!

blitz - September 30, 2019, 2:57 pm

Just wanted to say thanks for the high quality tutorial.

stavm3 - October 8, 2019, 3:03 am

Thank you for the content. Personally I have someone write it on an actual paper since it looks much more realistic then I edit it with Photoshop.

I also edit a bit with Photoshop so that services like Reverse Image Search of Yandex (A bane for Ewhoring) can not find it. Maybe I make a tutorial at some point if people really want it.

WhoreNet - December 2, 2019, 3:58 pm

great post OP.

This will help alot members!

Ana Cristina - December 2, 2019, 4:26 pm
