I am selling an ebook on how to get almost free hearthstone packs.

You need an initial investment of 15€. Which you will use to buy a common type of prepaid card. With this you can get around 70 packs of any kind. The method is repeatable on the same hearthstone account, but you probably have to get another 15€ prepaid.

I am selling this method for 20\$.

This includes support via. skype or pm.

No refunds.

Initial investment required: 15€

Time required: 20-30 mins

Materials required: Android based smartphone or tablet with hearthstone on it.

I will sell this to a maximum of 3 people.

PM me if you wanna buy via Paypal or bitcoin.

Cheers guys :)

Looks interesting...

I have received a vouch copy from eBookReviewer. He provides two simple methods (one requires you to spend ~\$15, the other requires a credit card but won't charge). He explains it very thoroughly. Not much to be said about it, it works! You get around 70 packs each time you do it. Get it now, it's pretty cheap and has been working for atleast 2+ weeks.

I'll take a vouch copy if you think I look trusted enough.

googlehacks - April 28, 2016, 6:55 pm

Get this now guys, eBookReviewer methods are working! ?

eBookReviewer - May 4, 2016, 1:00 am

New method has been tested out and the ebook as been further updated.

shinyfreak - May 7, 2016, 12:57 pm

I bought the eBook. There are really 3 different methods and are easy to do. Everything is explained step-by-step. With one of the methods you start to make 40 packs in a couple of minutes without investment and with the others you make even more every time and I think you can use them almost every day.

It's really worth the 25 euros.
