The Order is a general discussion and gambling group. We are extremely active within the group SF and we are also an extremely tight-knit community.

Be sensible and not post spam throughout the forums.

Have a good understanding of HF rules.

Be friendly. Flaming & arguments wont be tolerated. Debates are fine.

No scam reports/negative reputation.

Been a member for at least a month.

You kicked me some time ago, and I only joined to be a part of this "sector", only to find out it was super inactive.

Is it still inactive? If not I'll apply again. :)

That's the whole point of this recruitment, to make it active. I've placed Rabies in charge of it and there's strict rules about Gambling SF activity.

What do you understand about HF's gambling rule?: We can only talk about it, not participate in it onsite.

Do you agree to the group terms listed below?: Yes.

Tell me about your history on HF: HF has always been my second home. I've been here since 2009 and I really feel like I belong here. I first joined to learn about hacking and similar things, but with time I've learned a lot more than that, and I've gained friends whom I consider really close to me. I really hope I can stay here for a long time and keep helping people, and creating new things.

I discovered the forum long before I actually created my own account - I was keylogged on a chat room, I eventually got in contact with the hacker and he introduced me to the idea of keylogging and Rapzo Logger, I typed in both keylogging and Rapzo Logger and it brought me to HF, a few years later I decided to come back, create my own account and attempt keylogging myself, I then got to know the community and decided to make my stay here at Hack Forums long-term.

What do you understand about HF's gambling rule?:
We can discuss it but we can not make on-site raffles/lotteries

Do you agree to the group terms listed below?:
I do

Tell me about your history on HF:
I started out as a tiny little scrub like the most of us, then became a bit of a leecher like the most of us, then decided it was time to become normal. so like the normal person I would become I went ahead and bought L33T because that's how you turn normal here on HF! After a while of derping around on HF I quit for a long time, then when I came back I tried being atleast half HQ so I started helping people and then I found a site called moneypot.com I went ahead and used it, copy pasted a site from someone else (it was open source) so I could decide what the house edge would be and eventually started thinking about how I could make it a ton easier. So I asked for a few gambling strats & got almost nothing. Then I figured why not just recreate that one bustabit script which everyone uses (The recover script with bets based on your balance) and thus my site was born. And then I was looking for gambling skypes/groups to join because why the hell not :D

What have you contributed to the community? (Link threads/posts):

Not sure if I should call it a contribution but I know that this could help atleast 2 lazy hf members who want some money & have no trouble leaving their pc on.

Why should we pick you over other applicants?
Because I know my way around in gambling and I even created my own gambling site with built in recovery mechanics to prove it.

How often do you gamble?:
Daily/weekly
It used to be weekly but now I just open up my site & press start (Although I wouldn't exactly call that gambling which is why I said weekly)

What type of gambling do you do? What platforms?:
Dice/bustabit and satoshimines

Are you currently in profit?:
Right now? no. Sometime in the future? Hopefully!

Big wins you've had (Provide screenshots/links):
I don't have many big wins since I usually go small and go alot.

Simply that HackForums is purely for the discussion of gambling, and that no one participate in gambling on-site.

Yes, will be incredibly active and respectful within the group if accepted.

Tell me about your history on HF:

I have been a member on HF for almost 5 years, taking breaks along the way but always coming

back. I have owned a group on here known as the 'Coders' as well as a group called 'Logic' a while back. I am an active gambler, but never participated in it too much here due to site restrictions but would love a community that provides serious discussion on the topic.

I do not have 20,000+ posts like many members as I only post when I feel I can contribute to something, so a gambling group is of huge interest to me.

How often do you gamble?:

Multiple nights a week, I try to hit a casino at least 2-3 times a month alongside sports betting.

What type of gambling do you do? What platforms?:

I play a lot of poker mainly, but I also do online sport betting.

Are you currently in profit?:

I'd say yeah, I usually cash out after every win then go from there. I have made a good amount of money from gambling.

Big wins you've had (Provide screenshots/links):

I've had a few large wins, in the thousands. Not any screenshots I can provide sadly, maybe some receipts I can scrounge up.

Do you agree to the group terms listed below?: Yes, I do agree to the terms that are listed below.

Tell me about your history on HF: I've been around hack forums since 2011. I joined this community in search of some new friends and a business partner for a company I wanted to start. Shortly, after I ended up meeting a whole lot of people and ended up creating this tool used for skype that I ended up selling here. From there I learned how to do basic coding, cryptography, marketing, e-commerce, graphics and web design. But, with being on hack forums for a long time you experience many ups and downs. For instance I've had my shares of ups on this website and my share of down moments when I lost my reputation during a rep kill and losing a lot of friends I made across this website. With me being here for quite some time I've been in a couple of groups I've been in; Marketers, The Empire and another old one that I can't think of the name right now.

What have you contributed to the community? (Link threads/posts): I've contributed my share of helping people set up websites, stress test tools, support there company and deals with customer support. Along side that I've done account giveaways, stress test account giveaways and more.

Why should we pick you over other applicants? You would pick me over other applicants because I have a fair amount of knowledge in black jack and gambling using slot machines in a casino. I've gained this knowledge from losing thousands in the casino and then making it back in less than a weeks time. With gambling it's really based on luck; however, with a few tips and tricks you could be increasing the luck to benefit you in the long run. Those tips are what I want to bring to the group. Along-side that I believe I would be picked over other applicants because i am hard-working, active, dedicated to the group I'm put in and most importantly a friendly guy whose easy to get a long with.

How often do you gamble?: I gamble every single weekend and use about 1500-2000\$ every time I go to the casino. If I am not at the casino gambling I spend a lot of time gambling on horse races. I've had loads of luck with horses because my grand parents have been following them for years and brought me into it when i was extremely young. From there I fell in love with it and watch the races practically every day that they have one. I bet around 200-500\$ a day that a race is going on and I've one a fair share of money; however. I tend to keep my profits on hand for betting. That way I don't lose to much of my own hard earned money!

What type of gambling do you do? What platforms?: I do online horse race gambling on an ios application and I also play blackjack and play the slots at a casino out near me that I love going to.

Are you currently in profit?: Currently. I am in 5,000\$ profit right now and that's only been 2 months of gambling. Keep in mind I save a lot of my wins to gamble back with and keep a small portion for my self that way I make sure I always profit!

Big wins you've had (Provide screenshots/links): The biggest win I've had would be \$4,800+ dollars on a slot machine. I don't believe this is that impressive and so I won't provide a screenshot. However, if proof is absolutely needed I have no problem providing that for you!

Tell me about your history on HF: I joined Hackforums in 2010, when I was a total skid in hacking, coding, and product creation. By 2013 I was developing my own products with a partner, and have made a decent amount of money selling eBooks, booters, etc. I would say the biggest thing I've learned on Hackforums is not te money making or anythng, but the ability to work with others in a cooperative environment, and both benefit from our combined effort.

What have you contributed to the community? (Link threads/posts): In the past I used to answer questions in the education community as well as various coding subforums. More lately, I've sold eBooks, where I've always been available to chat with clients and help them make the most money they can.

Why should we pick you over other applicants? I'm not an idiot when it comes to gambling. Most people here believe you can make money off dice, blackjack, roulette etc in the long run. Truth is you cant, its negative Expected Value. I only make bets/gamble on things that I can make money from long term, and this has been my motto ever since I got into gambling. I hope to teach others how to find profitable bets/games/props and to make as much money as I have.

How often do you gamble?: I gamble at minimum once a week, but almost every single day really. I only make bets on things I'm the favorite on.

What type of gambling do you do? What platforms?: Daily fantasy sports, along with other things :P.

Are you currently in profit?: I'm up over \$20,000 off of these ventures.

Big wins you've had (Provide screenshots/links): The biggest win I've had was from daily fantasy sports for \$1000 and \$2000.

What do you understand about HF's gambling rule?:
We can discuss it, brag and talk about it but not use the forum to gamble.

Do you agree to the group terms listed below?:
From this moment and on, I agree with the listed group terms below.

Tell me about your history on HF:
It started off with two friends of mine that have been involved with this forum since 2010 and they told me about it in 2015. It was the time when I was looking for a place to discuss, interact and learn about programming java and to even teach others basic stuff they needs to know. It escalated into me enjoying my stay and after that I started to interact not only in the programing sections but in sections such as the gaming and politics sections.

What have you contributed to the community? (Link threads/posts):
Android rooting tutorial, recommended apps and usage:
<https://hackforums.net/showthread.php?tid=5034569>

Helping people with computer related questions and computer builds both with my own thread and on others requests: <https://hackforums.net/showthread.php?tid=5063280>

Elo boosting people (helping them get better ranks) on league of legends for free:
<https://hackforums.net/showthread.php?tid=5287097>

Why should we pick you over other applicants?
I am active, I love gambling and to learn new things about it, discuss and interact with people that do the same thing. I am very social and me together with many others would say that I am a lot more social than the average social person, which is quite positive I guess for a group like this. I would be able to contribute with lots of stuff.

How often do you gamble?:
I wouldn't say that I am addicted honestly. Though I am gambling several times a week in different ways and almost always each day but with variation in what type of gambling and how much I gamble.

What type of gambling do you do? What platforms?:
Sports betting, CSGO gambling, Casino (blackjack), Poker, jackpots (very rarely). The platform I use the most for all of these 5 gambling types is called bet365. Though I play poker most of the time on pokerstars.

Are you currently in profit?:
My net win is possitive and will probably almost always be positive because of my huge wins already. If my net win wasn't positive I would probably stop gambling big a long time ago. I acknowledge my limits, what makes my net win being so good is several huge jackpot wins. They

keep me up high even though I never play on jackpots anymore.

Big wins you've had (Provide screenshots/links):

Here is a 1600\$ csgo jackpot I won which I converted into money and I got around 1400\$ in total from it: <https://www.youtube.com/watch?v=9RrKsiNVQiE>

Rest of the wins and losses are on bet365 which I can't seem to get a history on.

What do you understand about HF's gambling rule?:

Hackforums can NOT be used for gambling. However, the discussion of gambling and anything around it is allowed.

Do you agree to the group terms listed below?:

Yes, I agree to all of the terms. I don't have problems with any of them.

Tell me about your history on HF:

I registered on the 1st of May, 2014. The reason why I came to HF was to buy a paid RAT. I was into RATting and I wanted to get some more, I heard of some good (paid) RATs on here so I joined. After a few months, I stopped RATting, and I looked into the market here on HF. I saw people making a lot of money daily, people selling e-books, products, and so on. I made my first e-book (wasn't even l33t at the time) and I started making online money. It was the first time in my life and it felt really good.

Day after day, I've been learning more and more, and I am still learning more and more. I came in a skype betting group, it was a paid group, but I was one of the 'vouch copies'. I came into the group, and people gave me advice on soccer games and so on. I followed their advice and made my first \$50 with a few simple bets. That's when my gambling experience started. (online).

After a while, I became a moderator on www.btcroll.com, and became one of the owners, just before we shut down. I really got into the (online) gambling world and I loved every bit of it. I lost a good amount of money, but I'm still in profit.

A few months ago, I had found a new gambling method, together with my partner (Royal Bash). We tried it out and it worked amazingly well. It was a real success, and we're still earning money with it today.

What have you contributed to the community? (Link threads/posts):

I've contributed a lot to the community, and I'll keep doing the same. I'm not just contributing with my threads, giveaways or whatever. I try to help anyone whenever I can, through Skype, PM, or anything else.

I don't think it's needed to put a lot of links in here, just take a quick look at my threads:

Why should we pick you over other applicants?

I don't know. I think everyone has an equal chance of getting accepted, however, I think people differ in skills and contributions. I think I'll be a great help to the group, and I'm an active user. I also have a lot of things to offer, not just to people in the group, but to anyone on HF basically.

How often do you gamble?:

I gamble daily. It depends on my scheme though. I don't gamble when I'm busy with school, cause it really gives me a headache sometimes, hehe. ?

What type of gambling do you do? What platforms?:

- Sport bets. (soccer).
- Casino games (black jack, live casino games etc.)
- Bustabit/primedice/satoshimines, sites like that.
- Computer, Mobile Phone (toto f.e)

Are you currently in profit?:

Yes I am. Especially with my new method. 'Risk-Free' gambling. ?

Big wins you've had (Provide screenshots/links):

I don't have screenshots, or links, I will have some new proof in a few days/weeks though (new method). I think you'll have to trust me on my words for now.

Thanks for this recruitment, I appreciate it. I wish everyone good luck getting accepted! ?

Only for discussion purposes, and no onsite gambling or lottery systems whatsoever.

3. Do you agree to the group terms listed below?:

Yes, agreed.

4. Tell me about your history on HF:

I started out on HF back in November, 2015, where I was completely new to the forums, not knowing how much I would come to love it. Originally, I came to HF to sell 8 Ball Pool Coins, and accounts. This proved successful for a few months, but I eventually stopped after there was an update to the game, which disabled me from being able to continue selling. After this, I dabbled in EW for a bit, selling AGC, and after a short time doing this, I wanted to move on and continue with other, less bizarre, forms of money-making. Since then, I have continued with AGC buying and selling, and other forms of arbitrage, on and off the site, including forms of E-commerce. In addition, throughout this time, I have occasionally bought and sold OldSchool Runescape gp.

5. What have you contributed to the community? (Link threads/posts):

My contributions include my sales threads of Pool coins, and AGC, as well as giveaways, here and there.

6. Why should we pick you over other applicants?

Since joining the HF community back in November, I have realized that there are many incredible users that have proven beneficial in establishing and maintaining ongoing relationships with. I am extremely open to helping anyone where I can, and I also look to build connections with users that can potentially help me, when needed. Its the fluid exchange of ideas and knowledge that I love most about the community, and I think joining The Order would increase my ability to participate in what I love so much about HF. Because of this, I will be active and a positive member of the group.

7. How often do you gamble?:

I try not to gamble, because I tend to lose more than I make. So when I am feeling lucky, I take the risk. Sometimes its worth it, others, not so much.

8. What type of gambling do you do? What platforms?:

I used Bustabit a few times, but my primary source of gambling comes from Runescape staking.

9. Are you currently in profit?:

I am in and around equal.

10. Big wins you've had (Provide screenshots/links):

<https://gyazo.com/1580118d80068f6cf550e9084773f92f>

There are several other times in which I came out extremely positive on RS, I just don't take pictures of it often.
