Thread: [Will the 1.8x come with the new modern theme?](#)

Mint - April 28, 2016, 11:44 pm

I heard Omni is upgrading the forum version to 1.8x - Does that mean it will come with the flat/modern theme?

Bluffer - April 28, 2016, 11:45 pm

Yes, I'm pretty sure he's said with the 1.8 upgrade we will have a new theme that is responsive and modern.

To clarify, it will NOT be a new theme. Just an updated version of the previous theme, blackreign. That's what I recall reading, correct me if I'm wrong.

Edit: I'm wrong, read below.

[There'll be a responsive theme](#) that'll come awhile after the move to MyBB 1.8. The revamped Black Reign will come before that.

Is there an updated roadmap thread anywhere or one currently open for discussion?

I see the last update was in 2015 according to omni's last post and that was almost 7 months ago. Can't wait to see the new changes in the future!

Omniscient replied to a request for an update on the development roadmap, you can read his reply [here](#).

Obviously, February or March is in the past but I held off of another request another update so as to not pressure or aggravate him.
