Vouch for Maxim, OP knows what he's doing.

Do not hesitate to pm him if you're interested.

I think the animated part works the same way in Photoshop, you could just make 2 images and upload them one after the other.

This is really helpful for beginners, can't wait for part2 ;)

Awesome tutorial man! I'm new to GFX and I tried making my own signature banner (the one I'm currently wearing) and now I'm looking into learning how to make thread designs.

One question, do you do your moving font with after effects?

Thanks :)
