Thread: [eWhoring and Traffic](#)

JøjØ - April 30, 2016, 8:48 am

Okay one thing before I go about this... >Yes some sites generate more traffic than others.<

Just wanted to get that out of the way before I go and explain.

So I just wanted to say, I've been ewhoring for a month now and have made over \$3k in earnings. I use the most basic website for my traffic and I have come to realize that it's not mainly about the site you use it's mainly about how you advertise yourself on it... Most of you new guys from what I've seen just like to post something simple and try to get customers.

Try think of something creative. I'm on the same generic website I've been on since I first started out.

Just remember it's not all about the amount of traffic the site gets it's about how you advertise yourself on there... Hope this works out for you guys.

Just 3 tips:Learn how to persuade your buyers/potential buyers.

If your ewhore pack doesn't have verification pics, try pick out the best previews you can. (I currently use a pack without verification and have made over \$800)

Learn how to advertise yourself. Not with simple messages... Make them attract other guys.

Ever need anymore tips/tricks for ewhoring add my skype or pm me.

I totally agree with OP , i have earned about 300\$+ from E-Whoring to saturated traffic websites within 7 days.

Also i believe it's not only the way you advertise but also your SEing skills.

When I try to get traffic If I don't mention that I'm selling I am getting dozens up to a hundred horny fags, mostly timewasters, but when I mention iam selling a get a lot less

Trait - April 30, 2016, 9:07 am

i also agree, i use mostly all saturated sites and still make a lot from ewhoring.

Yeah, Totally agree! SEing is the most important aspect of ewhoring if people can't master this they might have a lot of trouble ewhoring.

Good point OP, I don't think this is emphasised enough. After all, first impressions matter.

I'm not going to spoon feed people, but I try my best to set you guys in the right direction.
