Thread: [\[Free\]\[Tut\]How to verify any site that asks for phone number verification\[Tut\]\[Free\]](#)

pbhuvanesh - April 30, 2016, 9:58 pm

Hello HF :) this is my 3rd post so please bear with me.

Let us say you want to monetize your youtube account and you are need of a phone number what can you do if you do not have a phone number? Or say you want to use some fake number but would like to get it verified ? Simply follow the steps below and have fun :D.

Android:

- 1.Open Google Play Store
- 2.Search for Text Free
- 3.Register yourself
- 4.Enter an area code
- 5.Select a number
- 6.Complete registration
- 7.Confirm your registration
- 8.Get 60Mins free talktime from that number
- 9.You can now use this number to receive sms/calls
- 10.Use this number to complete phone number verification.

Iphone:

- 1.Open Appstore
- 2.Search for Text Free
- 3.Register yourself
- 4.Enter an area code
- 5.Select a number
- 6.Complete registration
- 7.Confirm your registration
- 8.Get 60Mins free talktime from that number
- 9.You can now use this number to receive sms/calls
- 10.Use this number to complete phone number verification.

Bluestacks:

- 1.Open Google Play Store
- 2.Search for Text Free
- 3.Register yourself
- 4.Enter an area code
- 5.Select a number
- 6.Complete registration
- 7.Confirm your registration
- 8.Get 60Mins free talktime from that number
- 9.You can now use this number to receive sms/calls
- 10.Use this number to complete phone number verification.

Note:You can use this phone number to have another whatsapp account/viber/hike/wechat etc..

????

You can thank me later ??????

Not working with gmail/yahoo/hotmail etc..

Trivexlimum - May 1, 2016, 3:04 pm

I have used text free and they do not work with verification. Sites like <https://smsreceivefree.com/> will do it for free no registration required.

But sites like Google, Microsoft etc will not accept their numbers.

Most of these apps/sites that do receive free sms are only usable on some accounts but almost all will not work on gmail/yahoo/hotmail and many other social mediums such as facebook.

Did sideline work? Because i know most of the free texting apps and websites such as tempophone dont work with gmail, yahoo, hotmail. etc. They all state that you cannot use a VoIP number to verify . Im very interested in finding one that works myself!
