Thread: [\[HQ\]\[Tut\]How to Bypass Steam Guard\[Tut\]\[HQ\]](#)

pbhuvanesh - May 1, 2016, 2:43 pm

Hello HF

Thought I will make some tutorial for you guys today. So without any further wait lets get started?

What you will need and steps ?

RAT - I would recommend DarkComet or nJRat

A good paid crypter - I would suggest Ghost Crypter cheap and worth both Scan Time FUD and Run Time FUD ([link:showthread.php?tid=5169234](#))

Spread your RAT. There are various methods out here use one of them to spread.

Be patient till you get slaves (Hope he has steam).

Now use the file explorer in your rat and download these files listed below

Files:

C:\Program Files\Steam\config\config.vdf

C:\Program Files\Steam\config\loginusers.vdf

C:\Program Files\Steam\config\SteamAppData.vdf

Now download these files into your PC.

Paste these into your steam folder

Open Steam

Baaaaam! You now have access to his steam ?????

Now you can use his account to trade items ?????

Sliynex - May 1, 2016, 2:54 pm

You sure it's possible to trade items without email verification or waiting 3 days?

I'll try this later on today and edit the post with results :)

Insane Developer - May 2, 2016, 2:40 am

This is very well known already...

Spritey - May 2, 2016, 4:09 am

I gonna use this thanks!!

LilKil - May 2, 2016, 5:13 am

I thought they patched it, it is still working ?

LilKil - May 2, 2016, 5:14 am

shit Sorry for 2x post, im on my phone,

Just tried it and it still asked for the steam guard mobile authenticator

AlirezaVF - May 2, 2016, 11:52 am

looks amazing

lets try it

thanks for this

sobolek - May 2, 2016, 3:29 pm

Its still working - no problem, but 90% people with skins use mobile phone with mobile guard - you can do nothing.

klonerk - May 3, 2016, 1:32 pm

Guys I think it's possible to get Skins by sending a trade offer to the hacked account and accept it there

Basically just the way around

Dunno if this works just a theory

THE RULER - May 5, 2016, 8:11 am

You can't trade items using this, no point.

L33tness - May 21, 2016, 2:18 pm

Great Tut! I was attempting to crack an account and i couldnt get passed the steam gaurd :(I dont know why i didnt think of this to begin with. But now i know! Thanks for the share mate!

gamingvpn - May 21, 2016, 3:59 pm

nice tutorial i will try this tn timer

wow nice i will try this tn timer

L33tness - May 21, 2016, 9:55 pm

LOL you trying to get ur posts up gamingvpn?

danielphansen313 - May 25, 2016, 7:56 am

This looks very nice, i will try later when i'm home!

Ghzt- - September 21, 2016, 4:24 am

So this bypasses the confirmation of the tradeoffer aswell? :blackHat:

Old public knowledge but thx anyways

Allay0x3 - September 23, 2016, 6:43 pm

Wow awesome should try this
Wow great guide, thank you mate.

this is a bit useless... if you have already gained access to his computer why not just hack the email itself? you get the security code by email...

kpown - September 24, 2016, 5:59 am

Does this bypass mobile authentication?

Ghzt - September 26, 2016, 10:13 am

I have a client with skins, but he has steam guard on so I'm having a issue but whoever can help me with this, PM. I'll give you a AWP Asiimov ft ?

Peter Griffon - September 26, 2016, 11:00 am

Thanks for the share, lad. Quite useful.

xf0xalz - September 26, 2016, 11:02 am

This thread was created 8 month ago , before mobile authentication... Use your brain !
