Thread: [40000+ Downloads! Drizzy's ADVANCED Dox Tool V2!!!! DOXING HAS NEVER BEEN THIS EASY!](#)

Drizzy?? - May 1, 2016, 9:48 pm

*Read V1 thread reviews and vouches here: <https://hackforums.net/showthread.php?tid=4252995>

Yes, it's here. My first one got so popular I decided to make a second, improved version. This one should NOT have any errors or crash like my last one which is outdated and abandoned.

Features:

- IP Tracker (Provides latitude and longitude, city, and state of the IP provided)
- NEW AND IMPROVED! Auto-Doxer! Choose between: Email, Username, or First/Last Name of victim and it will give you common subscriptions/sign-ups related to that piece of information. (See media for picture).
- Dox Manager. Easily manage your dox and even export it to a clean and simple text file.
- Faster than V1
- More stable than V1
- Actively updated
- Cleaner GUI
- Added more search sources

Link doesn't work for you? Is your anti virus blocking it for whatever reason? Just confirmed it's working fine.

What's the detection? Something with "rep" in it? If so, Avast detects it because it's not a commonly downloaded program, not because it's a virus.

Checking it out, will update.

kpown - May 2, 2016, 11:13 am

Can't wait to try this xD

YayHar - May 2, 2016, 11:18 am

To be honest, this is actually quite nice.

It's not a one button dox program (Didn't think it would be)

I will be using this in the future ;D

Sh4wn - May 2, 2016, 11:18 am

I do'nt wanna use this if it's a trojan. Can someone update me?

Drizzy?? - May 6, 2016, 10:37 pm

Okay. Finally got around to adding clickable results. Re-download it from the same link for the new update. New update has two new features:

- *Allows you to open found results in your default web browser (double click any result that is a link)
- *Auto-updater (When you open the program, it will ask you if you want to check for updates)

Let me know how it works out for you guys.

***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

wow amazing abuse of free website apis and themes what an original product you can feel the effort

Actual constructive criticism: Try to experiment with your own ideas. Just using APIs gets boring. You're not dull, you can probably think of a lot of other stuff, and that way it's usually a lot more fun. As nice as it is for some people to have this all in one, it does get rid of some of the freedom you get from just viewing the websites you use. This means your tool is limited to a niche audience, and worse, I'd say it's one that isn't too familiar with doxing.

Something that could say, I dont know, automatically grab results from whitepages, Spokeo, etc., and gather them into a list, then try to get a list of names, and then cross-reference it with data it gets from phone numbers to figure out a probable suspect would be a good example of something new and unique that helps everyone. It's still for the lazy and still causes you to lose some freedom, but that's a truth about almost all software. At least in that case you'd have the upper-hand over a browser in some convenience related aspects. I'm not very creative, so you should probably just leave the creativity bits to yourself.

I think this one looks a lot more clean and simple, but I miss the auto DOX feature. If you can add it that would be great, if not I will stick with v1.

That's partly the reason I made V2. V1 got sooo popular but it hardly works anymore so I made a new version to hopefully take its place.

- *Make sure you have the latest program version

- *Make sure the program is closed

- *Delete the "Newtonsoft.JSON.DLL" file in the dox tool directory.

- *Make sure AV is disabled

- *Start program and let it re-download the DLL file.

Should fix it.

(Jun 23, 2016 05:32 AM)benka Wrote: [\[CITE\]](#) How can i get this to work on linux?

My guess would be to try running it under WINE (I've never messed around with it, so I'm not sure if it'd work given the .NET dependencies this program has, but it's worth a shot).

In other news...we're about 100 downloads away from 2000!

Monostable555 - June 23, 2016, 3:17 pm

Great program btw! You should add a feature to look up someone's personal id, many countries in the world use year/month/day - XXXX to identify people. Example 19970923-XXXX and that's "my" personal id. If you could make that work it would be great!

Drizzy?? - June 26, 2016, 7:46 pm

First semi-major update to V2. Changes are below:

- *Added progress bars to each search
- *Added multi-threading (searches should now be faster)
- *Program will not become unresponsive during searches
- *Added a few more search sources.

i hope itz not a virus.. xD

aesthetiic - December 15, 2016, 11:12 am

Just used this as a test with someone I've already doxxed.

For myself; this worked perfectly. It grabbed some of the information I already had, and this'll make it so much easier for me in the future.

My antivirus didn't pick anything up using it - thanks a lot! :D

Crosstox - December 16, 2016, 8:55 am

Thanks fam! I am in need of this!

Cryptic5 - December 16, 2016, 2:40 pm

This looks fine, however is it possible to make it work in europe, for example netherlands,denmark, sweden etc?

sry if this has already been adressed, my connection is slow so I really cannot sit scrolling 24 pages. The gui looks perfect though

SIM-3124535 - December 16, 2016, 3:11 pm

Very cool program! I vouch for this! It works perfectly and is better from all other doxing tools/sites I know! I recommend you to crypt it tho.

juulstar - December 16, 2016, 9:15 pm

+Vouch, works like a charm.

AV didn't detect crap.

(In the future add a crypted PW so lechers cannot get a hold of this tho.)

ALSO FREE WOW

Norton doesn't let me download it... I can't set it to let me either.

It recognises it as "WS.Reputation.1"

It also says the file risk is "Medium"

Anyways I can avoid it blocking it... or has the file been changed or what?

EDIT:

It isnt letting me download it at all now and blocks it out. It wont let me download or run the dox tool :/ What do I do

Hypocrattes - December 28, 2016, 7:16 am

Very nice program. Works very well, especially for a free dox tool. Fun to just play around with and search yourself up as well.

***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

<configuration>

<system.windows.forms jitDebugging="true" />

</configuration>

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Very nice. Simple UI, easy to use and looks clean
Vouch ;)

Null911 - October 29, 2017, 2:14 am

Thx for this man, I love :)

3/67 Virustotal is Ok ? Seems different with the initial scan no ?

Edit : Sandbox'd & seems OK :)

cxxrey - October 31, 2017, 1:16 pm

can confirm I got it downloaded, however nithing shows for the possible phone or address. also how can I use the dox feature?

Using - October 31, 2017, 9:31 pm

Vouch! I've used v1 before and it worked great. hopefully this version is even better ;)

ProGem - November 1, 2017, 10:18 am

Does this tool, Drizzy Dox tool really work?

getithackednow - March 10, 2019, 8:53 am

I got a red flag from the tool. I am not sure if there is a newer version or anything. I am new to the site and just wanted to test to find out some info about fishy people.

In any case, apparently even Win10 flags it as Malware. Is there anything I should be concerned about?

I also get an error from Microsoft .NET Framework

The email search option won't work. Person search won't return any results. I am left to believe this is a dead application.

Thanks!

940mx - April 15, 2019, 1:36 am

I don't think its still working, guys. I keep having error using it.

coolblown - April 17, 2019, 4:25 pm

can you please update this magnificent tool it seems to be missing a dependancies

savagepatatoes - April 28, 2019, 9:56 am

just a reminder that alot of people dont know u dont trust their vt that they put up its never real thats why i always check it my self

940mx - April 28, 2019, 11:08 am

I have a error with this, I can't use it i dont know why

Gh0st1337 - April 28, 2019, 6:45 pm

Well it would be good if this works.

toomy - May 6, 2019, 7:05 am

But this doesn't work now

Fr33d0m - May 13, 2019, 5:31 am

Sadly an outdated tool but when it was updated it was great. I still use the dox organizer

potatochip878 - May 17, 2019, 9:33 am

wonderful program thanks

i rate it 5 stars *

Maxrep - May 17, 2019, 9:37 am

will be using this soon for my clients, thank you.

Shlomodls - May 18, 2019, 2:08 pm

cool tool gonna try this out, even tho I never used your v1 before :)

Isolophilialia - May 19, 2019, 5:11 am

Doesn't seem to be working. Seems abit dodgy if i'm honest.

Gygrid - May 19, 2019, 1:06 pm

Thanks so much mate. hope i enjoy it

Fluox - May 19, 2019, 1:29 pm

Vouch for my guy drizzy; glad to see you back in the game, i loved using V1 and now i know i'm going to love V2.

Ps; amazing design, i have ran into a slight issue in regards to the emails scans however.

Kind regards,

Fluox ?

nik la poliss - June 30, 2019, 6:51 am

Wtf it was working great. But now idk why the username searches is not workin ? ?

F11 - July 1, 2019, 2:45 am

Drizzy did you never finish the v3 version?

RiL3DEMON - July 2, 2019, 3:21 pm

I've tested this and it's so cool

Works perfectly

spreader - July 3, 2019, 3:48 am

great tool,bit bggy but worked ok

Yes, it's here. My first one got so popular I decided to make a second, improved version. This one should NOT have any errors or crash like my last one which is outdated and abandoned.

Features:

- IP Tracker (Provides latitude and longitude, city, and state of the IP provided)
- NEW AND IMPROVED! Auto-Doxer! Choose between: Email, Username, or First/Last Name of victim and it will give you common subscriptions/sign-ups related to that piece of information. (See media for picture).
- Dox Manager. Easily manage your dox and even export it to a clean and simple text file.
- Faster than V1
- More stable than V1
- Actively updated
- Cleaner GUI
- Added more search sources

Not much of a avg guy, could you tell me why three avgs are saying it's a trojan? Are they false

positives?

Edit: Took the risk and ran the program gotta say this is fucking cool well done, not i virus :D

Raze XC - August 22, 2019, 7:48 am

I wouldnt download it, it immediately disable Windows defender, wouldnt allow me to re-enable it, and none of the options did anything

ImPaint - August 22, 2019, 6:36 pm

It dont work for me... Just pops up with an error. Probs on my side as it done this with V1 too

***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Will try out

Thanks a lot

Looks rly good, thank you for good software

Brad Wilson - October 10, 2019, 9:32 pm

hat's the detection? Something with "rep" in it? If so, Avast detects it because it's not a commonly downloaded program, not because it's a virus.

dutchhacking - November 8, 2019, 2:15 am

thank you so much bro love it

neverending8 - March 16, 2020, 3:24 am

I can't get it to work. Anyone have links to free sites online for public records? I'm tired of having to use paid sites that give info online I could probably get m yselft

You may call me V - March 17, 2020, 11:15 am

Here's another scan of it and it's good:

Does this dox work anywhere in the world?

Smallville - March 21, 2020, 11:38 pm

After reading your amazing guide hopefully I will be able to utilize this awesome tool.

And again thanks a ton for your contribution!

Chaaaaaz - March 28, 2020, 4:30 am

It's a false-positive. The tool itself uses techniques that AV software categorize as "malicious".
