Thread: [Does anyone know how to decrypt passwords encrypted with Double MD5? =\(](#)

Smack Tricks - July 6, 2010, 10:12 pm

I have a huge list but ill post ones I need right away. If someone can help me whatever I get out of this ill share with you.

password one: e9ac1bcecd4b466b58330717d92b1367

password two: 143a316a9763cd54cecb9345e85f9541

I'm sorry but it is impossible. The nature of a one-way hash function (in theory) is such that it is impossible to decrypt it.

pass 1:blahblah

All I could find right now

Smack Tricks - July 7, 2010, 11:06 am

wow you were right about the first one. can you do the second?
