Join the Beta Testing : <https://hackforums.net/showthread.php?tid=5275808>

Current Feature:

- Small output (110kb to 130kb)
- Coded in C#
- Pure Code and no drop for stealers
- Works on Unicode OS
- works with all browser new versions
- Email recovery from many email clients
- Easy to crypt with any C# or Vb.net crypter
- Many other features which you can see in the images Posted above.

Its still under Testing and will be on sale once its pass all Test. Please leave your comments below.
You can also Pm me if you like to talk about it.

New Update:

Got Output smaller to 60kb to 70kb
Some Snap of the email Logs:

Newest Update:

Some Snap of Recovery Logs
Final Output Size is 78kb with all features enabled ?

Post here or PM me if you have any suggestion. Beta Version should be out by today or tomorrow.

Looks amazing dude! good work OP ?

HopperSat - May 2, 2016, 9:33 am

Dear Devil, can you send me in pm please, how working your Skype Spreader?

DamienVC - May 2, 2016, 2:15 pm

How do you intend to achieve FB spread? That is one complex procedure, good luck on it.

legendaryzones - May 4, 2016, 12:15 am

Nice Job man! I'll be on the look out for its release!

HiddenEyE - May 4, 2016, 1:45 am

warlock3329 - May 14, 2016, 6:27 pm

You should just consider not making it at all over making it in a managed language

Its all under managed language currently,
might move to native in near future.

Try to use ActiveSetup reg key to startup, it should hide your app very well ;)

BigJoy - May 15, 2016, 11:28 am

Good job man :D I love u :D
