Am I allowed to start a service where I buy stuff for people on Amazon, but with a discount?

So basically I have lots of GC's, could people send me PP/BTC (70% of item total for example) and then I purchase it for them.

Middlemen can be used etc, just wanted to confirm the basic idea first.

I think this is allowed, as long as these GCs were not carded

I'm almost certain "buy4you" services are disallowed, but I can't seem to find the post or rule. I'll keep looking.
