No free crypters are runtime FUD.

Not even some of the paid ones are.

Not even some of the paid ones are tested on Bitdefender, AVAST, AVG, MalwareBytes Bypassed all
and you can test the others

Vatnik - May 7, 2016, 1:37 pm

thanks bro, gonna try this out... PM'ing you right now.

D?ceived - May 8, 2016, 3:29 am

Nice crypter dude this was 100% fud for me about ten mins ago!

sabadu - May 8, 2016, 9:44 am

Excelent crypter.. almost fud for me. only avg detected the file as it was not crypted.

ZCash - May 9, 2016, 5:29 am

I just tested this crypter with Zyklon HTTP.

It's completely FUD. Tested runtime on AVG, and it was not detected. It's a very nice crypter, and has a nice GUI. I hope it will be FUD for long.

Thanks Nexus.

sungod88 - May 9, 2016, 12:03 pm

let me send u pm really need it :) :P

ciklamo54 - May 9, 2016, 3:19 pm

Really good for a free crypter, i must say. Just bypassed Avast using Babylon RAT with self inject.

It's 1/35 atm, which is good for a free crypter

<https://scan.majyx.net/scans/result/b844893cad5a6818f64c9a89e30862c564f08a68>

Everything is working fine, just as expected. Assembly cloner would be nice, but you can still change the assembly manually.

Vouch for Lexus, and thank you again ?

Aeezakmi - May 9, 2016, 3:25 pm

You can't say that, people eventually will scan it with their AV or VT (most people scan on VT within
gaming anyway) so all things come to detect anyway.
