Thread: [Can't neg rep when you have l33t but are showing as 3pic](#)

vaxo - May 2, 2016, 10:30 pm

I have no clue how hard this would be to add or if you intended it to be this way but, when you try to neg rep someone and your display group is 3pic and you have l33t you can't neg rep them but yet there is an option in the drop down box to do so.

Didn't know where else to post this, just trying to help out :)

No it's not a cool idea, there's a reason why it's not a feature.

Anybody can buy l33t with no verification, so if someone really wanted to, and had the money, they could create a bunch of accounts to wreck havoc.

There should be one such option.

Option has been there for L33t as well. It wont be removed.
