Thread: [Anyone Interested in a Recode of FODDER's Cheat?](#)

SIM-1899562 - May 5, 2016, 12:52 pm

I got to spend some time with FODDER's cheat before it was posted publicly.

I thought the fact it couldn't be customised was pretty shit, so I recoded one from the ground up and added configs.

If you're not familiar with how Lincoln's aimbot worked, you unbind mouse2, bind mouse3 as +attack. When you hold mouse 2 it will lock on and start shooting mid way through the aim. Having aimbot on mouse2 is bad enough let alone not being able to change it.

If you're interested hit me up on skype: j.barnes96 or PM me

Contains:

Sig scanning (automatic updating for CSGO)

"FODDER's/Lincolns" aimbot method

Aim speed, FOV, VisCheck, delay time, aim key

Glow (because fuck not being able to play in full screen) + colours based on health and toggle key

Bhop

Lan mode (no visuals or display of cheat)

And in game settings loading

lurkeryuri - May 5, 2016, 1:03 pm

i don't have skype installed, how much?

Clause - May 5, 2016, 1:05 pm

Definitely interested in it, never tried the original and doubt it still works?!

terrorfool - May 5, 2016, 1:52 pm

I'll release one soon for free because I have a friend of mine working on it.

OP is a copy-paster who got the file from me and now desperately tries to make money by just adding a curve on it and producing a completely different shitty product. He tried to replicate Fodder cheat's method and miserably failed. If you need the DLL files from his attempts just send me a message so I can pass them on to you.

User is Subversion from UC, also posting with double accounts trying to get info and copy-pasting safeshot, the garbage that Dara uses to make those autistic clips.

Didn't I fucking tell you not to try and sell anything related to Fodder you stupid 19y old cunt?

No you told me not to mention anything related to you, and I didn't. Side note, ask any mods that guy isn't me.
Plus you never gave me any code. Only the binary, which I did recreate.
As for the dlls feel free to do what you want with them.

terrorfool - May 5, 2016, 2:08 pm

Nah, I'm saving my breath from now on.

a) info is some junk that I fed to Organner years ago, you're a dumbass.
b) I'm getting the money back (which are drawn from a friend's account, whom you've scammed)
c) I already sold your garbage and Lincoln's garbage but this time legitimately and put a lot of salesmanship into it to make it happen. This is why you had no issues with the bank. But you will now.

It's just amazing how childish and unprofessional the 90% of the entire community really is.

1tap - May 5, 2016, 3:44 pm

Arent you that Guy from codehook?d

SIM-1899562 - May 5, 2016, 3:51 pm

Yeah it's been a while since anyone noticed.
We spoke before?

We probably didnt talk a lot, will do tomorrow though.
On mobile Atm ?

Clause - May 5, 2016, 4:49 pm

So with this recode, you changed the aimkey? It's no longer Mouse2?

SIM-1899562 - May 5, 2016, 11:48 pm

You can change any of the settings listed to what you want including aimkey.

exorinternal - May 9, 2016, 2:19 pm

if this is real, interested.

Justlookinglol - May 9, 2016, 4:35 pm

Why would anyone want it....

There's a lot of people on here which bum off him.

F00KZ - May 10, 2016, 3:52 am

Sounds interesting.. What's the risk detectable wise (VAC)?

netpulse - May 10, 2016, 4:02 am

Dont expect to make money if you just updated a old public source

SIM-1899562 - May 10, 2016, 11:18 am

Every person gets their own build.

I've been using my base for about 18 months with no bans.

(May 10, 2016 04:02 AM)netpulse Wrote: [\[CITE\]](#) Dont expect to make money if you just updated a old public source

I'm not using any public sources or bases.

Unless you mean Lincoln's actual code? In which case is the first I heard of it.

terrorfool - May 10, 2016, 1:51 pm

(May 10, 2016 04:02 AM)netpulse Wrote: [\[CITE\]](#) Dont expect to make money if you just updated a old public source

Let him do it. As if warning people ever worked. As if we didn't do the same once upon a time.
