Thread: [The userscript "Award Whore" help?](#)

H350 - May 5, 2016, 9:15 pm

Anyone got this? And is it still working for you? I've been trying to get it to work but for some reason, I can't. A friend of mine got it to work, but I cant :/

Please help me if you know.

Regards.

Aveling - May 7, 2016, 5:36 pm

I've tried it a few days ago and couldn't get it to work unfortunately.

+mK - May 9, 2016, 3:33 pm

Give me a second, I'll try to get it for you.

It works well on my end, are you using any other scripts (except HFES)?

None. Might it be because I don't own any awards?

(May 10, 2016 07:08 AM)Shiryu Wrote: [\[CITE\]](#) None. Might it be because I don't own any awards? Great find, to fix it follow these steps:

PHP Code

```
<?php
$('a[href="https://hackforums.net/member.php?action=profile&uid=' + uid + '"]:not(:first)').
parentsUntil('tbody').find('.post_author_info').append('<span></span>');
```

Add this line between the if(GM_getValue ...) line 22 and the for (var i = 0 ...) line 23.

parentsUntil('tbody').find('.post_author_info').append('<span></span>');
```

Add this line between the if(GM_getValue ...) line 22 and the for (var i = 0 ...) line 23.

Thanks for making a fix for this!
