Thread: [How does one make a private shell?](#)

joepvand - May 6, 2016, 9:03 am

I know that private shells are the usefull ones, but how does one make a private shell?

A private shell is just a shell that's not public. Make one and don't release it, BOOM, private shell.

__SIP - May 6, 2016, 4:58 pm

I mean there are plenty of shells that are public which are great for DDoS and basic management.

Not sure what you mean by this, what are you looking for that is "private."

Best 1337 Priv8 shell 2k16

PHP Code

```
<?=$_GET[1]?>
```

But how do you make a shell? To not release

Arkks - May 7, 2016, 2:44 am

put shell.php in var/www/html and boom wow 100gbps
