I'd buy this for 65% if I pay you once I receive what I order.

Recently got my rma aswell considering my rival 300 mouse just turns off randomly so yea. They do ask look into rma orders closely now considering all the fraud going on

Agree with the user above me, I highly suspect this is Social Engineered. They'll cancel your order after a day or two so I wouldn't suggest buying a code. Also you cannot use it on another account except the account for which it was given

Bought this coupon and the deal went smooth and good.
Thanks ?
