Minecraft Gambling Site Concept, made it up as I designed it.

I'm aware that some aligning is off but I've been working on this for multiple hours and was anxious to finish.

I think either the panels should be dark, or have a brighter Minecraft background. Looks amazing though, good job dude. 9.5/10

Thanks, I could experiment with a dark color scheme on the future.

Crynx - May 8, 2016, 1:11 pm

Good job it looks really nice. I only would make the background a bit brighter.

Yeah I mentioned in the thread that some aligning was off.

Wasn't feeling well when I made this, so I kinda rushed to go to bed :P

Gonna fix the alignment later.

The actual gambling game is like Satoshimines but with minecraft blocks.

Stone, diamonds, etc.

No worries, appreciate the feedback nonetheless and the effort to check the alignment.

But why use a site when you can use minecraft itself :o

Start a second bitvegas (first one dieded) and I'd be on there pretty quick!

Yeah I was thinking it could intertwine well an actual server.

It's just a concept though, not an actual project.

Probably won't even be attempting to make this.

Would be a huge investment (5k) and would require significant web dev skills which I don't have.

Thanks for showing interest though.

Your sense of layout is really on point, but have you tried making the orange a bit lighter?? I'm aware that it evens with the orange coming from the lava, but it could leave a much more positive expression if you were to brighten it up a bit. Maybe even change the background to a more positive one??

- Sincerely.

Idk, I seem to like the night theme it has going, and yeah I made the buttons match the background so it ties in nicely.

Not sure how changing the button color to lighter would affect the piece, but I can experiment in the future.

Thanks.
