Thread: [\[Tutorial\] SQLMap in Windows \[Pics\]\[Simple\]](#)

Rubixa - May 8, 2016, 10:10 pm

Firstly my fellow members, We need to download and install [Python](#) I am using 2.7.11.

Once you have Python installed, You will need to head over to the [sqlmap](#) site and download the .zip file.

Once you have the .zip file, Go ahead and extract it to the desktop and rename the folder to "SQLMap" and copy this folder into the Python installation folder, Mine is "C:\Python27".

Once you have done this, You're almost set. Go back to your desktop and right click and create a new short cut.

Type in "cmd" and than name it "SQLMap" and click finish.

Right click on our newly made shortcut and click properties and go to the shortcut tab and find where it says start in, copy and paste your directory of the SQLMap folder we made earlier in the Python folder so for me it's "C:\Python27\SQLMap" and that's it.

You can choose to mess around with the colors and font etc. if you desire.

Hope some of you find this tutorial useful.

The GRim - May 9, 2016, 12:26 am

Simple and easy to understand.

Good for beginners.

Rubixa - May 9, 2016, 12:28 am

Good for beginners.

Very good for someone looking to get into SQLMap and not really sure about different OS's yet.
Thanks Grim.

XeAnarchy - May 11, 2016, 6:57 am

How would I use that to get website info? Where should I start? Thanks

JLHooM - May 11, 2016, 7:55 am

Simple and easy to understand.

Good for beginners.

Thanks Rubixa .

blazelord - May 11, 2016, 8:59 am

thanks mate .. looking forward to the rest part :)

Frukt - May 11, 2016, 9:01 am

Awesome tutorial! Ain't nobody got time to start kali linux.

You don't need kali linux? Just buy any vps and git clone the package.

Kashmiri_Wolf - May 12, 2016, 5:41 am

Thanks For SHaring ?

There are many tutorials here on how to find a vulnerable website and perform an attack.

No problem buddy, thanks for the reply.

(May 11, 2016 09:01 AM)FruktFPS Wrote: [\[CITE\]](#) Awesome tutorial! Ain't nobody got time to start kali linux.

Some people don't, yes. Which is why I deemed it necessary for a tutorial for Windows what this very reason.

Probably would save your money if you're just going to buy a VPS to do this.

No problem, hope you found it helpful.

?BORNE? - May 13, 2016, 1:15 am

Nice tutorial on installing but are you gonna do tutorials on using sqlmap

Rubixa - May 13, 2016, 1:27 am

No problem, and definitely, Thank you.

Killerz190 - May 14, 2016, 5:57 am

so does this like take down a website or hack it or something?

Rubixa - May 14, 2016, 5:59 am
