blazelord - May 9, 2016, 6:43 pm

how do we crypt while maintaining the spoofed extension ?

augustine99 - May 10, 2016, 2:12 am

Which crypter is compatible with your hawkeyespy keylogger

chuksthedon - May 10, 2016, 2:46 am

i want to find out, i had a license on the hawkeye . it didnt expire yet buh my license was removed, does this mean i can still continue my license on this reborn??

you can still crypt spoof I think because it still executable file even if you spoof to jpg, mpeg etc.

(May 10, 2016 09:25 AM)goodman12 Wrote: [\[CITE\]](#) Now you got me confused....am planing on getting your ispy now comes hawkey....so which one is the best?

You can check the difference by visiting our Official Site. However, iSpy still have more features than HawkEye. I am start selling HawkEye because old customer wants HawkEye Back!

blazelord - May 10, 2016, 3:19 pm

but the spoofed extension wud be have to change only if the crypter wud have a spoofer too

LulzClerk - May 11, 2016, 1:20 am

You should add a lifetime option + paypal as payment option aswell

augustine99 - May 13, 2016, 12:00 am

Haweyespy Reborn is it still active as before, because the former one work for me but as for this i

have not give try.

hope you added new function without removing old one
lol

If you really want to spoof extension then you can choose this option while crypting because almost every crypter does have this feature.

I think Sheikh Crypter does support .NET files but I am currently not sure about this. Please ask from the original coder for .NET compatibility.

Thanks for verification sir, I really appreciate. To be honest, you just someone helped over TV and suddenly I saw someone shitty logger and the customer told me his shitty logger never works. I told him what can I say. Just want to told everyone here. Before purchasing, think about what are you going to purchase. If someone want proof then I always show you over TV. Not advertising any fake tools than the rest have. Anyways thanks again!

I have a feeling this is due to LinkCabin's video...

I don't understand how you managed to sell craps like this tbh, people aren't here for C+P code that uses public frameworks and are vulnerable af.

This is not the reason. I told 100's time before this is not the reason. There is much big difference with the current and old version.

This is a HQ product and anyone who is sales trashing here is either a hater or something else.

GLWS mate I have used from ISPYlogger till now and its doing very well.

+ for you
