Thread: [CageFS bypass](#)

scorpoin - May 9, 2016, 3:49 am

Hi,

I'm looking around a way to bypass cagefs so I may be able to symlink and access others user /home dir. I've already got /etc/passwd file

Looking forward for you kind response.

Regards
Scorpoin

hi dude ..
use Broken exploit .
etc/passwd cagefs bypass ..

Link download php file:

I think you didn't read my post , I said Ive downloaded /etc/passwd that means I've bypassed it. But issue is to bypass it for /home and view all other users home path as well.

Regards
Scorpoin

right bro , my english lang very bad sry

but i send to you a priv solution .

?

scorpoin - *May 10, 2016, 11:06 pm*

its only for /etc/passwd dear ive already said that I bypassed /etc/passwd

to symlink users of server bypass CageFS !

the frist you need Cpanel on server (y) and you symlink via app on cpanel via 2082 por that bypass CageFS

scorpoin - *July 4, 2016, 12:19 pm*

can you explain that cpanel bypass for other users home directory .

Regards
Scorpoin
