Thread: [Freak out your Facebook friends\[2016\]](#)

Daredevil Amit - May 9, 2016, 4:06 am

Using this tutorial you will be able to generate a link for your Facebook friend, by visiting which he will be see a "you're blocked from sending messages" or any other error message.

Once this error message shows up on your friends FB account he will be freaked out.

Step 1: Goto the following URL: <https://mbasic.facebook.com/messages/>

Step 2: There you will see all your message threads, just click any message thread and copy URL from the address bar.

The copied URL will be something like

<https://mbasic.facebook.com/messages/read/?tid=mid.XXXXX>

Step 3: Now just add &error_code=1545038 to the end of copied URL.

So our final URL is

https://mbasic.facebook.com/messages/read/?tid=mid.XXXXX&error_code=1545038

Step 4: Send this URL to your friend.

OPTIONAL

Step 4: Use a URL shortener on this URL <http://goo.gl/>

Step 5: There a lot of error codes you can show, just change the number 1545038 to something else in &error_code=1545038

bumping up this thread...

bytez - May 11, 2016, 4:25 pm

Didn't work for me, but nice share anyways :=

raystar619 - May 12, 2016, 2:33 am

Nice Share OP, Trying this now

Must have done something wrong, provide me details if you need any help

L33tness - May 21, 2016, 1:43 pm

Hmm, how can we test this on ourself? I just tried it, but it just popped up the same page without an error.

I know what you did wrong..

You'r link was like "

<https://mbasic.facebook.com/messages/read/?tid=mid.1361912061323%3Afbbd5388863896c165&refid=11#fua> "

You need to delete &refid=11#fua or just simply change it to Code &error_code=1545038

Silent Militant - May 21, 2016, 7:33 pm

Only works for you. Not your friends. Just tested on 3 People, It works for me tho.

GamerBoss - May 22, 2016, 1:46 pm

nobody gona open a link with on FB
