Thread: [WEB Programming services](#)

4n14du\$K4 - May 9, 2016, 4:44 am

Hello,

We are full stack dev team of 4 members that work fulltime, all inhouse :) We can solute profesional PHP programing services.

What we can do:

PHP (Laravel, Symphony, Yii*)

Front end (CSS3, HTML5, JavaScript, Bootstrap, Meteor.js, Angular.js, React.js)

Ecommerce (woocommerce, opencart, prestashop, magento)

What we can't do:We will not bugfix other programmers systems

We do not work with other CMS'es (wordpress, drupal, etc)

We do not create landing pages or representative websites

Work flow:

Analyse > Specification/Prototype > Programming > Test and Bugfixing > Production

Latest jobs:

#1. Now we are working on stats4sport(.)com almost a year fulltime! Project is done and have a good success. We will end this projects support this month and we are searching new challenges.

-- What we did Spoiler ([Click to View](#))Full project developpe with Laravel
