Thread: [ScreenCap | PUUSH/GYAZO ALTERNATIVE | FAST & FREE & MANY FEATURES](#)

Gulddreng - May 9, 2016, 10:08 am

Puush/Gyazo Alternative

Information

ScreenCap is a screenshot capturing program and an alternative to puush/gayzo, created by me for HF.

Now, what makes this program so special? Well:

- it's free & fast
- you have unlimited storage
- no login required
- many features
- many options in Settings
- I listen to your feedback!

Screenshots

Download

Visit www.screencap.pw (scroll down for Download button)

[VirusTotal](#) (The program has been obfuscated hard; therefore some antiviruses in VirusTotal find the program as virus.)

NOTE

This program is very new. I have fixed every bug I could find. If you encounter any bugs, please report it to me ASAP and I'll fix it. Thanks and enjoy using ScreenCap.

Tech - May 9, 2016, 3:22 pm

This looks really cool, I'll try it out

S????i - May 9, 2016, 4:34 pm

It looks interesting to be honest!

May I ask though, what other features does it have that things like Lightshot do not?

Thanks!

skelly76 - May 9, 2016, 4:38 pm

So why should I switch from Gyazo again?

Gulddreng - May 9, 2016, 5:22 pm

(May 9, 2016 04:34 PM)S????iT??H????i Wrote: [\[CITE\]](#) It looks interesting to be honest!

Thanks!

I'm looking into adding any feature people need. If you got a feature request, let me know. ?

(May 9, 2016 04:38 PM)Aerial Wrote: [\[CITE\]](#) So why should I switch from Gyazo again?
It's up to you, man. ScreenCap is free, no login required, fast, and many other features.

RumbleFrog - May 9, 2016, 6:00 pm

Ay this is just like my site, good luck with this.

Is this made using C#?

Gulddreng - May 9, 2016, 6:03 pm

(May 9, 2016 06:00 PM)RumbleFrog Wrote: [\[CITE\]](#) Ay this is just like my site, good luck with this.

Is this made using C#?

Coded it in Visual Studio. ?

Orgy - May 9, 2016, 7:05 pm

Why this vs sharex which is also free, requires no login, and allows me to upload to imgur plus many other features

Shoe - May 9, 2016, 7:09 pm

(May 9, 2016 06:03 PM)phEx Wrote: [\[CITE\]](#) Coded it in Visual Studio. ?

Visual Studio isn't a language. Visual Studio is used to write C# .NET or VB .NET code. I assume you mean Visual Basic?

Gulddreng - May 10, 2016, 12:53 am

(May 9, 2016 07:09 PM)Shoe Wrote: [\[CITE\]](#) Visual Studio isn't a language. Visual Studio is used to write C# .NET or VB .NET code. I assume you mean Visual Basic?

Erm don't know what you mean. The program was coded in Visual Studio.

Lorenzo Gucci - May 10, 2016, 1:54 am

Looks like a nifty little tool OP, I'll be sure to have a squiz.

Orgy - May 10, 2016, 2:23 am

(May 10, 2016 12:53 AM)phEx Wrote: [\[CITE\]](#) Erm don't know what you mean. The program was coded in Visual Studio.

Dude how are you confused by this? They want to know what language you used. Visual studio is an IDE

BulletsModz - May 10, 2016, 2:25 am

(May 9, 2016 04:38 PM)Aerial Wrote: [\[CITE\]](#) So why should I switch from Gyazo again?

Why are you using Gyazo? It sucks cock.

Try sharex

LSDoom - May 10, 2016, 2:31 am

(May 10, 2016 12:53 AM)phEx Wrote: [\[CITE\]](#) Erm don't know what you mean. The program was

coded in Visual Studio.

How can you not know which language you used? Its either C# or VB.NET, the fact that you don't even know what an IDE is scares me.

Herbert - May 10, 2016, 2:37 am

Thanks but, no thanks.

I'll stick with puush even though they had a breach a while back.

wouldn't trust someone that doesn't even know what language he used to code his own program with.

but that's just me.

Raddify - May 10, 2016, 5:04 am

(May 10, 2016 02:31 AM)LSDoom Wrote: [\[CITE\]](#) How can you not know which language you used? Its either C# or VB.NET, the fact that you don't even know what an IDE is scares me.
yeah that is a bit odd.

mind explaining op?

Tommy Chong- - May 10, 2016, 5:11 am

You probably haven't coded it yourself if you don't know what language you used to code it.

Or you've found some code on le interwebs and edited wich requires pretty much zero knowledge, and based on your answer I see you have zero knowledge.

This is fishy af

Gulddreng - May 10, 2016, 5:28 am

(May 10, 2016 02:23 AM)Orgy Wrote: [\[CITE\]](#) Dude how are you confused by this? They want to know what language you used. Visual studio is an IDE
It was coded with .NET.

ZaYnDev - May 10, 2016, 5:36 am

if visuaal stuido probably .net

also add a auto copy and paste for forum like .png . like if i screenshot i could paste right here to see image

Gulddreng - May 10, 2016, 6:18 am

(May 10, 2016 05:36 AM)ZaYnDev Wrote: [\[CITE\]](#) if visuaal stuido probably .net

also add a auto copy and paste for forum like .png . like if i screenshot i could paste right here to see image

There's an option to save image as bbcode.

Orgy - May 10, 2016, 6:38 am

(May 10, 2016 05:28 AM)phEx Wrote: [\[CITE\]](#) It was coded with .NET.
C#.NET or VB.NET?

.NET is a framework not a language.

ZaYnDev - May 10, 2016, 6:40 am

(May 10, 2016 06:38 AM)Orgy Wrote: [\[CITE\]](#) C#.NET or VB.NET?

.NET is a framework not a language.
why do you wanna know dawg

probably sharex source since its opensource which is C#

Nadisty - May 10, 2016, 6:46 am

I'll probably just prntscr, but good job on contributing.

ZaYnDev - May 10, 2016, 7:12 am

Ok what's fishy about it ? He's not selling anything? And omni allowed him to buy it so i mean shitt

j1nx0 - May 10, 2016, 7:25 am

I'm laughing so much right now, this must be the best thread ever.

Snoopyz - May 10, 2016, 8:33 am

Looks good, might try it out in the future

Gulddreng - May 10, 2016, 12:46 pm

(May 10, 2016 06:43 AM)Orgy Wrote: [\[CITE\]](#) Because this dude claims to be a developer and bought a sticky for something he's giving away free but doesn't even know what language he uses for development. There's something fishy about that
My program was coded in VB.NET.

(May 10, 2016 06:46 AM)Nadisty Wrote: [\[CITE\]](#) I'll probably just prntscr, but good job on contributing.

Thanks. ?

I'm looking into expanding this to the whole internet with the help of SEO & Google.

(May 10, 2016 08:33 AM)Snoopyz Wrote: [\[CITE\]](#) Looks good, might try it out in the future
Thanks, let me know if you need any assistance with getting started.

glitchgxd - May 10, 2016, 2:04 pm

If it's free, is there an source we can view / compile ourselves?

You gotta understand the difficulty to trust anything on a forum of this nature... lol

Jamosa - May 10, 2016, 2:09 pm

Looks nice, i'll go ahead and try this out. Ty!

Gulddreng - May 10, 2016, 3:07 pm

It's currently not open source. But you may scan the program, or open it with Sandboxie. ?

glitchgxd - May 10, 2016, 8:00 pm

(May 10, 2016 03:07 PM)PH?x Wrote: [\[CITE\]](#) It's currently not open source. But you may scan the program, or open it with Sandboxie. ?

What's the point of releasing it for free and making a sticky for it then? Doesn't make sense unless

you're planning to infect people with it. You should make it open source and release under a public license.

Gulddreng - May 11, 2016, 12:32 am

(May 10, 2016 08:00 PM)Glitch. Wrote: [\[CITE\]](#) What's the point of releasing it for free and making a sticky for it then? Doesn't make sense unless you're planning to infect people with it. You should make it open source and release under a public license.
I don't think Omniscient would ever sticky a virus.

Lexus™ - May 11, 2016, 12:51 am

thank you for releasing this
i will check it out later

Pittinger - May 11, 2016, 2:33 am

(May 11, 2016 12:32 AM)PH?x Wrote: [\[CITE\]](#) I don't think Omniscient would ever sticky a virus.
I don't think he bothers with checking it. He even states that he isn't vouching for it and that it's your own responsibility for using the product/service.

Not saying it's infected, obviously, but figured I'd let you know.

Tommy Chong- - May 11, 2016, 9:25 am

(May 11, 2016 12:32 AM)PH?x Wrote: [\[CITE\]](#) I don't think Omniscient would ever sticky a virus.
Omni doesn't check the actual product.
And even if he did, it's only a matter of changing the download link so Omni can sticky a virus without knowing/caring

It's up to us if we trust it or not, and i'd say dont trust this.
I think op is out for infecting users, otherwise he wouldnt care releasing the source of this since it's free.

And with releasing the source people can give their opinions on it, spot faults in code etc.

It's only for the good, but OP doesnt want to release, so theres a high chance it's a virus.

Gulddreng - May 11, 2016, 9:47 am

(May 11, 2016 09:25 AM)Steff™ Wrote: [\[CITE\]](#) Omni doesn't check the actual product.

Just because I'm not releasing the source code doesn't mean it's a virus. The source code contains my website's API link, which can be abused if anyone knows it.

Orgy - May 11, 2016, 9:51 am

(May 11, 2016 09:47 AM)PH?x Wrote: [\[CITE\]](#) Just because I'm not releasing the source code doesn't mean it's a virus. The source code contains my website's API link, which can be abused if anyone knows it.

what makes you think we cant sniff the API link anyway?

glitchgxd - May 11, 2016, 1:47 pm

(May 11, 2016 09:47 AM)PH?x Wrote: [\[CITE\]](#) Just because I'm not releasing the source code doesn't mean it's a virus. The source code contains my website's API link, which can be abused if anyone knows it.

lol dude you're on hackforums. if you're making it exploitable, it will be exploited. you're better off releasing the source so people can help you make it better.

(May 11, 2016 09:51 AM)Orgy Wrote: [\[CITE\]](#) what makes you think we cant sniff the API link anyway?

^ exactly this.

RumbleFrog - May 11, 2016, 1:56 pm

I think if you really want users to use this, release your API, you can easily throttle it, I use open source applications like ShareX

Nadisty - May 11, 2016, 2:13 pm

Just make it open source op, it'd make your life a hell a lot easier lol

personuhpoizon - May 11, 2016, 5:34 pm

(May 11, 2016 09:25 AM)Steff™ Wrote: [\[CITE\]](#) Omni doesn't check the actual product.

It's only for the good, but OP doesnt want to release, so theres a high chance it's a virus. I personally don't release the sources of my programs (virus-free) because I am selfish and do not want people taking snippets/copying my code etc etc.

I definitely see what you mean though

Admiration - May 11, 2016, 5:38 pm

It looks like you invested some time into this. It's interesting. However, I doubt that you will get any uplift on this, considering the alternatives that are better than this as well as Gyazo / Puush: ShareX

However, doing this is always a great learning experience. I saw before that you said that "it is coded in Visual Studio". Visual Studio is an IDE, not a language. Just thought that I'd throw that out there.

Good luck in the future, I can definitely tell that you have a lot of skill and knowledge, it just needs to be improved upon.

Best regards!

Gulddreng - May 11, 2016, 5:40 pm

(May 10, 2016 05:28 AM)PH?x Wrote: [\[CITE\]](#) It was coded with .NET.

How someone can develop software and not know which programming language he used is not makes sense. Only explanation is he didn't program it, atleast not all of it.

lamNyan - May 13, 2016, 4:43 pm

Why should I use it over Lightshot?

Jaex - May 13, 2016, 5:06 pm

(May 13, 2016 04:43 PM)lamNyan Wrote: [\[CITE\]](#) Why should I use it over Lightshot?

Lightshot software uploads to Imgur then embeds that image in their web site with advertisements around it. So it is better for you to use software which can upload to Imgur directly and give direct URL to image.

An0nym0us5 - May 13, 2016, 8:36 pm

I am new to HF. I am a linux user and I have a huge intrest in learning programming from the ground up. I envy people who write their own programs and I hope to be there someday (and I will, believe that). If anyone has advice for me to start this long journey please let me know. Thanks!

I'm sure you didn't coded it.

As I mentioned before, I'm pretty sure he just found some source code and edited it or something. Otherwise he'd clearly now without hesitation what language was used to code this program.

Everyone who codes knows what he's capable of, knows what languages the coder learned himself etc. The fact he didnt even know visual studio is the IDE, tells more than enough. He didn't code it himself. Maybe edited at max (Don't need any knowledge to do that right? just common sense)

How exactly would you profit from this though?
Well you can profit from the shared URL. Sometimes people screenshot and upload to the website, so you can add banners. Just make it difficult to hotlink, and you can profit.

Teh Afro. - May 15, 2016, 8:01 am
