Thread: [\[TUT\] GET INFINITE: YT LIKES, TWITTER FOLLOWERS, SUBSCRIBERS/WEBSITE TRAFFIC](#)

iamthelast1 - May 11, 2016, 12:24 am

Hey Guys Welcome to My Tutorial:

WHAT YOU NEED:

- A Youtube Account (FREE)
- A YOULIKEHITS account (FREE)
- Mozilla Firefox (FREE)
- Imacros addon (FREE)

STEPS:

Signin to your youtube account (I recommend not using an account you would cry over if banned)

Close the Tab and go to YOULIKE HITS and Signup. (On Mozilla Firefox)

Open Up the Imacros addon (should open up on the left)

Click record and click on anything. Then Click stop and save as YLH or anything else really. Right click and choose edit.

Delete all code there might be and copy and paste this code:

bitbin. it / JJqwxfo

I can't copy it here as I do not have enough posts as it contains a link to an image and apparently I can't post images yet.

Save it.

Next go to Youtube Likes and click on one of the offers then start the script. Select the loop Option and write in 999999

You will now be generating points on mass.

Part Two

Once you have a significant number of points generated (You can leave the script running over night) Add your Youtube Video or Website or Twitter Account or really anything else there are so many options. And Offer 6 points / click.

You will start gaining instantly.

If you want to never stop gaining, in a new window run the script so you will gain points nearly as fast as you lose them.

Part Three (MONETIZE IT)

There are many ways to monetize your points if you don't want to just use it on your accounts.

Create gigs on: Fiverr, Seoclerks and other marketplaces and sell subscribers or hits and as it is real people you can charge more then other people selling bot traffic or likes and still get sales!

You can use the website traffic option in cohesion with my other Tutorial on how to earn a passive BTC income. And earn around 15\$ a day if you leave the scripts on, just from that! Creating gigs is more profitable but why not just do both!

I hope you guys enjoy this method, and share your results with me! (:

It is taking advantage of a system for personal gain. Hacking by definition is manipulating a structure in place.

brul - May 13, 2016, 4:25 am

it closes the tab and doesn't subscribe to other channels don't work for me

Saint-Luciferr - May 14, 2016, 1:38 pm

This isn't really politically correct in terms of infinity likes on social media sites. Also seems like a great deal of effort when there is enough addmefast macro's & programs around at the moment. Be advised that individual who use these methods are only gaining fake profile likes, and won't benefit in the long run.

Also it's been known that once obtaining the likes, after a couple of days you'll receive a dramatic decrease due to others trying to gain furthermore points.

Hey thanks for the steps. Your imacro script doesn't work anymore. May be because they YOULIKEHITS have changed the text as time passed.

CountZer0 - November 9, 2016, 8:12 am

Yeah, your script doesn't like anymore, I'll try to fix it though.

JustAKiddie - November 23, 2016, 9:52 pm

Yeah.. i don't like this method. doesn't really help at all.
