Review: You need to have username:password but they have supplied a combo list maker
- Extremely slow (Tested with another cracker) Don't even tell me my pc is slow because i have tried this with other
- 14.99\$ IS HUGE for this
- Password list is sh*t, How can instagram password have only 1 char? Put some effort
- The same password list, The same instructions for every program PUT SOME EFFORT for 14.99\$ i would give this a 2/10

I Followed instruction emailed you with a image(proof) of paypal transaction.

Waiting on product. Thanks

Edit*Got product and was testing it, tried it with my own insta and it failed also when i open instagram on my phone afterwards it was telliing me somthing attempted to login to my account and asked if it was me from spain. Yes/No question. I clicked yes and it let me into my account so im guessing cracker worked but instagram didnt allow the login cause of different country proxy.

I followed all instructions as per the PDF file, I ran the program for about 30 minutes but the progress bar is not even moving there is no "green" at all.

EDIT : My bad, I put the username instead of the email inside the combo list. Was confuse as the combo list stated "username". Will try again and update.

EDIT : After trying the email, there is still not progress in the progress bar.

EDIT : Will try to let it run for longer using the username instead of the email and see how it goes.

EDIT : Ran for about 2 hours still zero progress,I have stopped running. Others have reported running up to 20 hrs with no success.

Alright, I have sent an email.

There is zero error warning thou. Unlike when I used only 1 proxy, there was an error telling me that the program has stopped as there are no working proxy.

My program just sticks to "working" with zero progress (there is no "green")

EDIT : Got a reply from the email saying "it only turns green if you find the password". Ran the program for around 16 hours with zero success. I give up.

I had a little support I was given a different file which no longer gives me the lock out errors but it doesn't recycle the proxy list and the grabber gives me 3k proxies at the best of times so 3k proxies for a combo list that's got hundreds of thousands if not over a million combos isn't working too great as I get out of proxies error before I even see the green bar.

It's auto sent to you upon purchase unless you decide to pay through e-check (paying through your bank account from paypal)

In that case it takes a couple days for the payment to clear. Usually people pay through their card or balance so the payment is instant.

Just purchased and will post results as I have special accounts I will attempt this with

So far running the combocreator crashes and does not create a working list with the username, messaged on skype also.

Update: Running this on server 2012 so what I had to do was set compatibility mode to windows 7 on the exe and now works

Update: Doesnt load username/password list, application crashes saying out of bounds error

Update: Reloaded password list from txt file and created username/PW combo + proxylist and status is running, will update once something happens, on support with him on skype

Update: Program terminated, no valid proxies left to use it says: Task completed with 0 success, will try again

Update: So far using my own wordlists and no luck so far with any account, app crashes randomly when running long.

Issues and no solutions so far..

1. Instagram - account lock even with proxies (I've filtered good list of proxies too)
2. There seems to be 0 progress shown on the software.

3. Tried Facebook and there seem to be no progress too.
4. Tried so many different Instagram account and the lock still gets in the way, hence stopping the software and it's pointless to leave it overnight.

Conclusion, I don't get what I paid for. I've tried a lot of methods especially on getting good proxies. Plus, all these steps above I've done mostly on my VPS. Shouldn't be the issue with internet or anything a long that line.

Talk to the support, they stop talking to me once I lay down these problems even after I've done all these steps.

Hmm... I feel like this going to end up like many other software that is similar in HF.

Why don't you explain how does this works?

The video doesn't show anything... is this a bruteforce, or a database with a lot of passwords to find a match? I don't really understand

There's a guide that comes with the program showing you how to use it if you are stuck. Pretty basic. You make a combo list with the combo list maker (which is provided) and you put the combo list into the program and press start.

This is interesting. Can you maybe answer a few questions?

Does this only try the passwords you have on the password list, or does it eventually default to trying to crack it through true brute force?

Does this work with win 10? (Boguht a multicracker a while ago that did not work on my pc and didnt receive a refund either)

Hmmm seems nice but I do have a question...if I manage getting some hits...and then I try to login...won't I get some text saying "different device" or "different IP" ?

Correct me if I'm wrong but usually that's what I kept getting when I made .ini configs for it.

One thing, most accounts that get cracked by someone always has IP protection etc. For instance if I wanna hack my friends Instagram using this cracker and I know his location, will I bypass all the security (he doesn't have Two Factor) on. Please reply and I will consider purchasing it.

Bruh... DO NOT BUY this crap. it doesn't work. You will end up with an error on this hacker after a few hours.

This is the excuse list he has:

1) Let it run for 12 hours.... then 24 hours... when you reply him it was running for more than 24 hours, he will tell you let it run more.

2) After that, he makes you test your proxies.. and kinda throw it on you because he proxy grabber gives you 90% dead proxies.

3) AftEr that, he tells he will do something but you will never hear from...

THIS IS MY 3rd message and no replies yet..

DO NO WASTE YOUR MONEY ON THIS GARBAGE.

Does this hacker work as of today? If I'm unable to hack my target account with the password list included here, what's the best place to get new password lists?

Has anyone actually successfully hacked an instagram account with this hacker? I don't see a lot of replies of people actually saying that this hacker works.

1) not so many people are replying that the product works

Hi,

The situation with this software at the moment is that the software works, but the proxies generated by the proxy scrapper are so slow, that for me it would take 14 days to go through the password list provided with the software. Does anyone know an affordable place to buy working proxies in a listed .txt format?

Also, Vyrez told me that they are working on a new proxy scrapper to come with the software. Vyrez has always replied to me, and has helped me out with the usage of this software.

Sincerely,

This program is designed for targeting specific accounts. We have a premade password list and Snipr does not have a config for Instagram, It can't even be considered an alternative to this.

Why would anyone want to come on this thread and openly admit they hacked a specific account?

Anyways, there is no success rate because this is cracker and you can target any account.

The tool does not work like it used to

I know this tool is good and I have the original version and I know how it works and how to put a file

But it does not work like the former you need a lot of proxy

How can I make sure it works and does not need other tools such as ??

Cheers instagram finds the one i know and put it the list,

Just wish i could find the one im after ,

Seems to get locked out after 10 mins of brute forcing,

Ive also noticed it works on instagram a lot better if you use a email address and not the user name when creating the combo list,

Thanks for this,looking good after a few hours messing with it,

What is your recommended amout of passwords per list to try?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Not working at all (for me. i dont know for others). After couple of days not worked. Support really slow and responding every 1-2 hours and sometimes next day. I know vyrez have a lot of costumers, but when you are offering support, just do it. I had some issues with my OS because I have MacBook. He fix the problem in 3 days. I don't need to hack any account, I just need to log in two bot accounts and change the username , because i need them for my business accounts.

You claim I can hack ANY instagram account yes? What about accounts that have not been leaked in any databases for there to be combos for?

What if the combos I use or password list doesnt wokr because the user has a unique and long password?

I hate to break it to you bro, but no program will do that for you, if you don't already know.

That's just it, simple as that.

You can try buying password lists from elsewhere to increase your chances, but that's going to be it.

Hello Vyrez,

Let's say I have a specific username I want to get access to. I assume I will need to provide a list of all possible passwords for this tool to go through, correct?

It doesn't bruteforce/generate random passwords?

Thank you for your time to answer.

Can anyone verify if this app works and if it actually gives you the password to the targets account?

what if we don't have any clue what the password could be? doesn't the cracker software that you are selling just cracks the password out or is that wishful thinking here? Really interested in buying this but worried it won't produce the results I need, Simply I just want the password to two accounts without compromising them. Your help is appreciated.

I provide a video demo on the thread but we don't offer any trials for this program, considering the program has had a 3 year lifetime with over 1700 replies on the thread at the time of writing this post.

I think it doesn't work or else everyone will just buy this and enjoy hacking others :3 What do you think all those Stanford/MIT grads earning 6 figure salaries at Instagram doing? They are not stupid, maybe these tricks worked when the company started and had bugs/loopholes but not in 2020!!!

Also, how tries before the account and ip get locked out?

Does the software support Proxies?

What about Captcha's after a few tries?

I provide a guide with the program that explains how to setup and run the program. You import combos which you can get yourself or make with my combolist creator and than it begins to crack.

(May 2, 2020 03:05 PM)ViratKohli96 Wrote: [\[CITE\]](#) -snip

You have a completely incorrect wrong understanding of this program. This is a bruteforce program, not a back end exploit.

(May 2, 2020 09:07 PM)amievenreal Wrote: [\[CITE\]](#) Who has used this most recently?

We have numerous sales in the past couple of days alone. I don't ask customers to post their experiences on here as most are uncomfortable to do so.

Just by skimming through the thread you should be able to find numerous vouches. The program does support proxies and you do not have to worry about captchas as we support that as well.

If anyone else has any more questions or needs assistance, please contact me over Skype, Discord or Telegram!

T.O.S

Spoiler [\(Click to View\)](#)

- Sales trashing will automatically make support and future updates void.
- I can change these policies whenever I want without an update notice.
- By purchasing, you automatically agree to all of my current and future terms of service.
- Opening a chargeback will automatically make your support, future updates and refund policy void.
- We will not argue about what is sales trashing and what is not, if I deem it sales trashing then you have broken the T.O.S
- Leaking or sharing the program or the smallest detail will result in your support, updates and refund policy becoming void. It will also result in all your private information being put into a public scammer database.

The program is a bruteforce cracker, it runs the account against a password list till it finds the correct password. You can target any account thanks to my combolist creator but I don't guarantee that you will be able to crack any account.

This is a bruteforce program, the concept is quite simple. You can target any account with this tool but it works as a bruteforce, so nothing is guaranteed.

I bought the tool yesterday and today tested it. This is my honest review:

- 1) Vyrez. is awesome. He really knows how to handle customers and the support was amazing!
- 2) I had few troubles running the tool, but with a bit of Googling and Vyrez. help it was resolved. I tested on Windows 7. Keep in mind that you may need to install some updates for Windows, .NET, etc. * It is best to test it with a wordlist containing NO MORE then 3 passwords *
 - IF you don't see green bar when hit "Start" it means you have some updates to do
 - You should test with maximum 3 passwords, because of proxies

3) Biggest issue with the product is that you will 99% need to buy additional package with WORKING proxies to use

* FINAL *

Tool is working AS EXPECTED. Vyrez. is awesome

A password list, combo maker and proxy scrapper are included with the product!

T.O.S

Spoiler ([Click to View](#))

- Sales trashing will automatically make support and future updates void.
- I can change these policies whenever I want without an update notice.
- By purchasing, you automatically agree to all of my current and future terms of service.
- Opening a chargeback will automatically make your support, future updates and refund policy void.
- We will not argue about what is sales trashing and what is not, if I deem it sales trashing then you have broken the T.O.S
- Leaking or sharing the program or the smallest detail will result in your support, updates and refund policy becoming void. It will also result in all your private information being put into a public scammer database.

Can you add how long hf members have been using this for and happy.
or is it just purchases and partial who decides to refund.?

So this actually worked for you?

(Dec 30, 2020 12:38 PM)absojedi Wrote: [\[CITE\]](#) I bought the tool yesterday and today tested it. This is my honest review:

1) Vyrez. is awesome. He really knows how to handle customers and the support was amazing!
2) I had few troubles running the tool, but with a bit of Googling and Vyrez. help it was resolved. I tested on Windows 7. Keep in mind that you may need to install some updates for Windows, .NET, etc. * It is best to test it with a wordlist containing NO MORE then 3 passwords *
- IF you don't see green bar when hit "Start" it means you have some updates to do
- You should test with maximum 3 passwords, because of proxies

3) Biggest issue with the product is that you will 99% need to buy additional package with WORKING proxies to use
* FINAL *

Tool is working AS EXPECTED. Vyrez. is awesome
Thanks for all the info, could I ask where to get the additional package you are referencing? Also how long does it take on average to get a password / how often is it unsuccessful?

I have an old Facebook account I accidentally deleted a few years ago, is this something you could get back for me? I have a ton of pictures on there I no longer have because that was the only place I had them. Any help would be greatly appreciated!!

Gonna pick this up later but vouch for my

XLGdalton - April 9, 2022, 7:15 am

Well actually is this working when you set it up on the victims Pc

or you can do it by your pc
just with the Profile you want to crack?

One more last question, because i am about to buy it for real :D

I am using it on my own PC and all i need it is the

Victims profile Link?

or sth else please explain me

Can you please tell me if it works from your own pc
and only thing that i need is Victims
Profile Link?

T.O.S

Spoiler ([Click to View](#))

- Sales trashing will automatically make support and future updates void.
- I can change these policies whenever I want without an update notice.
- By purchasing, you automatically agree to all of my current and future terms of service.
- Opening a chargeback will automatically make your support, future updates and refund policy void.
- We will not argue about what is sales trashing and what is not, if I deem it sales trashing then you have broken the T.O.S
- Leaking or sharing the program or the smallest detail will result in your support, updates and refund policy becoming void. It will also result in all your private information being put into a public scammer database.

"HACK ANY INSTAGRAM ACCOUNT" is deceptive

if the program uses only the password list, it is impossible to do what it says.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
