Thread: [Scammed&Blackmailed By \(Royal ?\) - UID: \(3080855\) - Amount: \\$140 PayPal](#)

Asag - May 15, 2016, 11:57 pm

Username: Royal ?

UID: 3080855

Amount: \$140 PayPal

Story: Paid him for 1.5k loads for \$140. He said he would be able to do it. I gave him my virus then he said it'd take about an hour. He turned around and gave me a file saying it's a "File size changer". Clicked it and nothing happened then it melted. I told him it didn't open and he said he will be contacting the owner because he is renting the program. After that nothing. So i then made a thread so someone can help me get rid of the RAT. A few minutes ago he comes back and messages me on skype black mailing me with leaking my info to my local police. Anyways i will let these lovely screenshots do the rest of the talking.

I hope this is enough proof to get him closed.

UPDATED 5/17/2016 1:09 AM EST: He keeps messaging me and admits he RATTED me also is threatening me (not scared, getting a laugh out of this)

When dealing with bot sellers they have to be very very trusted because there's a lot of super shady kids who think they can get away with BS deals like this until there is proof like this which will hopefully come back to bite 'em in the @\$\$

Good luck with getting the money back and hopefully threads like this stay open until proper action is taken.

I was helping OP get rid of the malware on his system

after removing the malware I added a reputation report to royal to warn members to be careful around this user <https://hackforums.net/member.php?action=profile&uid=3080855>

an hour later I get a PM from royal or his "friend" to remove the reputation report OR ELSE

Link to Account #2 <https://hackforums.net/member.php?action=profile&uid=2966792>

I would say this is a legit scam report

Thanks man I'm sure a lot of ubers on the forum are great you just gotta look for the right one

anyway I have a link to the malware if anyone want's to take a look at it
royal is denying that it's malware I have it saved on my system if anyone needs proof
here are some screenshots of the malware in startup

It was through friends and family so i couldnt dispute the user or payment. Made an unauthorized dispute and paypal denied it.

The situation just escalated so quickly lol
we managed to remove the malware
I found out it's a member
I decide to help him out and report that scammer to the community

Getting WHH is usually not so easy on hf so for you to step in is something I'm sure I'd appreciate
in the future.
