Thread: [\[SELL\] Niche website with 100k+ visits daily + FB + Twitter acc - AutoPilot project](#)

Demogorgon - May 16, 2016, 12:56 am

Hello everybody,

Recently i got overloaded with work and do not have time to maintain website or promote it to achieve project's full potential.

Project is quite new (few days old, ~7ish days).

About the project:

Niche is #RoastMe

Website: <https://roastme.online/>

Automatization: You can post either from txt file (list of URL of images) or to upload images to image directory via ftp/sftp. There is cron job which imports images every 15 minutes and auto distribute it to website,facebook & twitter. - So yeah, everything is automated except finding images.

Buyer get option to purchase custom bot(from me) which will get images and top few comments from reddit and make usual image as seen on website.

What you will get ?

- Domain roastme.online - 1 year left (namecheap)
- SSL - 1 year left
- Whois Guard 1 year left
- Deploy on your VPS or my node will be assigned to you on your account.
- Twitter account
- FB page
- Auto posting from image directory or from txt file filled with links to images - Posting to Website,Twitter,FaceBook - you can add more social networks with ease, for example Google +1,etc..
- Reverse proxy with caching & protection
- +Optional Add-on auto scraping bot and image maker for \$\$\$

Maintaining costs:

\$5/month at the moment for the VPS, i am sure you can get 512MB ram, linux VPS for less. Server usage does not exceed 350MB ram and 70% utilization due to custom deploy.

Technical info:

- Reverse cloud proxy with caching
- Web server : Nginx - custom build
- PHP: PHP-FPM - unix sockets
- DB: MariaDB
- OS: Centos7

Project is quite hype right now with minimal efforts of marketing.

More info, statistics and proofs of ownership:

Most traffic is from US, so right now there wont be many concurrent connections, i've seen this number to go up to 70-80/1s

Traffic sources:

I am accepting offer via thread or PM.

Best regards,

Edit: I would prefer trusted middleman.

Payment options: BTC or PayPal

Is this site making any money?

I am not running any ads or similar.. at least not yet :)

This was mainly fun project with no intentions to monetize it - intentions were to test dev skills and automation overall.

If no one see potential or we can't agree on price, i will definitely consider running ads and other monetizing schemes.

100K daily visists and 60 Facebook likes? Where are you driving traffic from?

PM me with how much you are looking for.

Introduced FB a day-two ago, and connected on website, from that point is 60 likes :) and is increased with each post ;)

GramHQ - May 17, 2016, 6:47 am

I'm assuming you had a post on the front page of the /r/roastme subreddit. Which explains why you're only showing traffic from the past 24 hours.

Website is established few days ago, i was focused on automation rather than analytics and social.

Might be interested in buying this, I dont get the purpouse of the website though

<http://reddit.com/r/roastme>

Purpose is to get all images centralized on a website and social media, as many do not use reddit ?

Main purpose of the project was automation, ease of use.. It is quite viral niche...

Offer me via PM.

I don't see a website built purely on stealing other users content being monetized, that's a big no.

This thread is COMPLETELY USELESS, OP you did NOT provide gogle anlytics data and are proving requests data when a view/hit would generate many hits. This is very MISLEADING!

I provide that data to serious buyers only, which do not start/continue auction at 15\$ for a project that earns that in less than a day only from visits and not per click ... Sorry ?

I am not asking a private information, this can be obtained publicly... If your site really has 100k+visits daily it means over 3 million monthly meaning it should be on all databases for web traffic within a few days....

It's not even ranking on the first, second, or third page of google when you search roastme. Even when you google the actual domain name, it doesn't come up.

even a website with 300k visitors a day cant rank if the traffic came from social media.

guess you should . i really dont get the logic why the fck do he need to sell a website that can earn 4 digits a day specially when your visitors came from 1st world.

always remember that if its too good to be true , well then its not true

the average ads on 1 website is 3 to 4,

so 100k user = 300k to 400k impression .

the average ctr is around 3%.

3% of 300k is 9000 clicks

9000 x \$ 0.05 = 450 A DAY AND YET YOU SELL IT FOR 3 DIGIT ? ow god i hate drugs

Serious clients and offers got answered with GA access, even Nginx logs... If you have noticed,

your offer was too low for the system with such potential (~15\$ if i remember well). I do only serious business and transactions, and do not have time to waste.

Current owner showed real money, and got SSH access to backend to monitor activity and check validity of system before utilizing middle man.

I've tried to be nice and just ignored your offer/s. Here is the deal, you were not serious buyer based on my personal opinion which was based on your ridiculous offer.

That is it, get over it.

Lol, you dumbass refer to the rules on posting in this section"

" 3. All claims for revenue or traffic must include a screenshot for proof. "

You DID NOT provide CORRECT evidence for your CLAIM OF 100K PLUS VISITS DAILY, therefore this thread broke the rules and you clearly tried to decieve us by posting 30 active which does not even get 100k+ daily I have as ite with over 150 on active at all times and it doesnt get more than 40k..... Also I bet you got 30 acive by non legitimate traffic, you didnt show adsense either wiich would detect false views/clicks.... Just admit you are LQ AND SCAMMED.
