Thread: [TIN - Beginner Programming/Hacking Group](#)

THEMANSF - May 16, 2016, 2:02 am

Welcome to TIN

Hello guys,

Today I'll be starting a beginner programming/hacking group, called TIN. Our plans as a group is to improve programming skills and the understanding of hacking as a collective. How? you may ask, We plan on using the "Choose and work" method. Which means we will choose a project to work on as a group, but the project will have to be within our group's criteria. Our long term goal is we want to build a programming/hacking group that will have chemistry and equal knowledge to complete future projects with few guidelines.

The group is open to any user, if you want to join please answer these questions. If selected you will receive further instructions through a PM.

Code Desired Name:

Age:

Hobbies:

Why do you want to join this group?:

What do you specialize in?:

What Coding Language do you know?:

TIN Members:

Spoiler ([Click to View](#))

Leader: THEMANSF

Co-Leader: Chicken Wings

Members:

- ViniPuxx
- Hoodie+
- z3rocrash
- Shoe
- Rick
- Aakash
- dux0r
- aahgfdjhgrhgh

TIN has limited member spots.

ViniPuxx - May 16, 2016, 2:47 am

Desired name: same as my username here?

Age: Spoiler ([Click to View](#))something-ish

Hobbies: coding, cooking, philosophy, biology, plants, making kids and raising them

Why: I'd like to be able to help, you can ask me about stuff, find bugs maybe? Give some tips?

Languages: html/php/js, vbs, java (android), vb/C# .NET, python, c++ for arduino.. and maybe some more I don't remember right now, I believe an experienced coder will be able to use any language since mostly just syntax varies, doing the same stuff as in a different language.

edit: was just now in a nostalgic mood and remembered basic, pascal, vb6 and delphi :)

z3r0crash - May 16, 2016, 6:23 am

Desired Name: z3r0crash

Age: 32

Hobbies: Hacking, Programming, drawing, writing philosopher, teaching martial arts, cipher and decipher, lock picking as well as anything to do bypassing.

Why do you want to join this group?: Why not best way to develop your ability is when you learn from others as well as helping them.

What do you specialize in?: I'm jack of all trades pretty much. I don't specialize in anything I wish.

What Coding Language do you know?: Qbasic, Liberty basic, Visual Basic.Net, Javascript, html, C#, and python I'm going start learning C/C++ soon. I'm beginner on all those levels but I'm more skill in visual basic.net.

redlightrouter - May 16, 2016, 10:10 am

Desired name: Jake

Age: 16

Hobbies: learning to program, hacking and getting used to the Linux environment.

Why do you want to join?: Because I noticed that programing on my own is pretty hard so I can learn to improve my programing skills. Not only for programming but also for hacking.

Im not specialized in anything unfortunately.

What coding language do you know: basics of Javascript, php, html and a little bit of Python

H4WK3Y3 - May 16, 2016, 10:24 am

Desired Name: Hawkeye

Age: 16

Hobbies: Sports, Hacking, Coding

Why do you want to join this group?:

What do you specialize in?: Network Hacking/vulnerabilities in Linux

What Coding Language do you know?: Bash, A bit of python (I'm currently learning it)

wubbalubbadubdub - May 16, 2016, 10:35 am

Desired Name: Rick

Age: 19

Hobbies: Coding, Karate, Chess

Why do you want to join this group?: I'm currently working through some programming books but I'm bored of the grind. Having a set goal in mind, especially if it's related to hacking, is far more enjoyable than memorizing commands.

What do you specialize in?: Nothing, though I'm in school for info-sec.

What Coding Language do you know?: Python, Java, some C++, some android dev, and some bash

IAmSinful - May 16, 2016, 11:09 am

Desired Name: Sin

Age: 19

Hobbies: Computer Science, Wood/Metal Work.

Why do you want to join this group?: Cuz I Have Swag

What do you specialize in?: Nothing

What Coding Language do you know?: Py.

sophrosyne - May 16, 2016, 11:31 am

Always good to see new members giving to the community. Good luck!

Our group is to help others like you learn and have a new experience. Don't doubt yourself either buddy, it will ruin your life with no fun. If you want you can just apply by PMing. Hope to hear from you soon!

personuhpoizon - May 16, 2016, 1:35 pm

Desired Name: iKonja

Age:

Hobbies: Coding, Group-Hacking (I can also hack by myself).

Why do you want to join this group?: Spoiler [\(Click to View\)](#) I am very good at group-hacking. Previously I had a group with a few people and we stopped talking so it just fell apart due to lack of contact, so I am interested in joining a group and I have had this on my mind for a while now. I have been thriving to learn how to do multiple things and I feel if I learn with a group we will all learn more efficiently and the outcome will be way better ;).

What do you specialize in?: c# programming & getting good friends/sources ;) (also begging for bitcoin)

What Coding Language do you know?: Spoiler [\(Click to View\)](#) c#, Java(bukkit api), Flash AS2 and I use to know Python and VB however I recently gave up on those. I know HTML but thats markup language so I am not sure if that counts, and I also know how YAML works but its not even a language :P.

Thanks for reading, please PM the result :D

Desired Name: reB00T

Age: 21

Hobbies: Besides Smoking pot and listening to music I'll be coding for fun

Why do you want to join this group?: I've always been interested in joining a group of "hackers" who's goal is to get better and help others out ?

What do you specialize in?: Social Engineering other than that no specialties

What Coding Language do you know?: I'm familiar with JavaScript, HTML 5, BOO, python and a little bit of the C family (+,++,#)

Thanks for the consideration! ?

A7laco - May 16, 2016, 7:16 pm

Desired Name:A7laco

Age:15

Hobbies:Hacking, Social Engineering, networking, soccer, video games, porn, and making money

Why do you want to join this group?:Because i wanna be known in hacking world.

What do you specialize in?:espionage and social engineering.

What Coding Language do you know?:java (learning)

Shoe - May 16, 2016, 7:21 pm

Desired Name: Shoe

Age: 17

Hobbies: computers, technology in general, a bit of networking. Coding, development cycles, and in general anything to do with a keyboard.

Why do you want to join this group?: I've never really been in a "hacking" group per se, so I'd like to see what it's all about, see what people have to offer.

What do you specialize in?: Coding, bit of SQL injection attacks. Knowledge of how numerous systems work.

What Coding Language do you know?: Oh gosh. Here we go. C# or Java would be my strongest, followed by HTML/CSS (despite the fact they aren't 'coding' languages), Python (again not 'coding' per se,) and finally PHP or similar web based languages.

Sta.ze - May 16, 2016, 7:39 pm

Does TIN stand for anything?

Desired Name: I don't want to release this publicly. I'm trying to throw away my past on this account. I'm glad to share over PM or Skype though.

Age: Kind of a stupid question if you're going to be hacking. I'm mature enough.

Hobbies: Computing, Networking, Programming

Why do you want to join this group?: I've created a few 'hacking' groups. Two of which were successful in their plans. I'd like to be involved in some more and possibly meet new friends.

What do you specialize in?: DDoS, Linux

What Coding Language do you know?: Python is my main language. I know bits of C++

A NEW ERA... - May 16, 2016, 8:13 pm

Desired Name: J

Age: Mature enough.

Hobbies: Gaming, Learning.

Why do you want to join this group?: Always wanted to be something, as I read in this thread before "You never know what you can be without a little push" and I've always wanted to become good at deeper things in the field of hacking rather than just reading.

What do you specialize in?: Social Engineering, Engaging and being an Active Learner.

What Coding Language do you know?: Barely any Python, I don't know what language to learn because I've seen people just bashing each language.

xXxLOK1xXx - May 16, 2016, 8:27 pm

Desired Name:LOK1

Age:17

Why do you want to join this group?: To improve my Skills and to Learn New stuff well as Share my Knowledge with Others

What do you specialize in?: Cracking And SE , AND SQL injection , WebDeveloping

What Coding Language do you know?: Java .

lazers198 - May 16, 2016, 9:31 pm

Desired Name: Exenthias

Age: 16

Hobbies: Computer Science, martial arts instructor (what a coincidence @z3r0crash!), browsing computer science tutorials, drawing, graphic design

Why do you want to join this group?: I am interested in computer science and penetration testing but have never had anyone with similar interests to work with, so I am hoping to expand my horizons with other of similar desires. I think that I would be able to contribute beneficially to the environment. I think it would be a unique experience to see a community that I am a part of to rise up from just a few members who don't know too much, to individuals who could potentially make a career out of it, it might sound a bit far fetched but it sounds cool!

What do you specialize in?: I have no exact specialization, which is why I want to join, so I can figure out what I am best at.

What Coding Language do you know?: HTML, some Java script, basics of php. Learning C++

I am willing to learn just about anything as long as I can do just that, learn from the experience. I will gladly do my best to reciprocate what is asked of me.

I see lot of people on this thread saying that they don't want to post their age because this would be a hacking group. Hacking is not bad innately; black hat hacking is where you wouldn't want to release any legitimate information about yourself, but this is not referenced anywhere in the original post. OP sounds like he is trying to get a group dynamic, and that would be hard if they knew nothing about you. Just a personal thought, hope I have a chance at getting in though! ?

WhenURoFIButThenDie - May 16, 2016, 10:22 pm

Desired Name: Prochronist

Age: 15

Hobbies: Coding, Psychology, Rubik's Cubes, Chess, Philosophy, Law.

Why do you want to join this group?: I'm sort of a beginner to the world of hacking, but I can see how a group could be beneficial, in small groups exploits are shared more openly, and how people use those exploits are more controlled, there's also trust, the group may share a goal, plus, I am always looking for new opportunities to learn and explore new things.

What do you specialize in?: Coding, I've messed around with a bunch of stuff, but Coding is my speciality.

What Coding Languages do you know?: I made a Trojan and Worm in Visual Basic, but I am good at Batch, JavaScript, C++ and Python as well.

Hello everyone,

First off I just wanna thank everyone for applying to TIN, I'm really glad this many people want to join. Now I wish I could accept every single person here, but with our current project we need a bit more of a controlled environment. So It would make things more of a hassle trying to make a group of 30-40 members focus on one project, hope you guys understand not trying to be a dick or anything. With that all said, In the next few hours/days I will accept a minimal to smaller amount of new members, but Members who aren't selected during this period will be put of a list for next recruitment period. So basically if we start a larger project that requires a lot of minds, I will select new members from that list. Well I wish everyone good luck, and welcome future TIN members.

Francis Gallagher - June 7, 2016, 3:33 pm

Here goes a shot in the dark..

Desired Name: Furas (same as here)

Age: 24

Hobbies: Fitness, reading, learning

Why do you want to join this group?: I want to join, simply because I got into hacking not too long ago. It has always been something I was into, but never really sought out. I saw it as "fantasy" until I looked more into it. Then, I fell in love and the desire to learn more and more just grew inside me.

What do you specialize in?: Unfortunately, nothing right now. Though, I am eager to find out my true specialization as I know everyone has one.

What Coding Language do you know?: None, at the moment. I am about to learn some python and look into javascript. Otherwise, I am a VERY new hacker. I was following a TUT I had found on here, and an external website on how to use Kali Linux, couldn't figure out what I was doing wrong. The tut was from 2012. Thus, I am attempting to learn all that I can, from as many sources as I can. I am a sponge. I do hope I at least get a consideration. While I may not be the smartest, or know anything about hacking, I am 100% committed to the cause.

Just decode this, and you get access to our group!

In case anyone decodes and has a problem with this and will only join like, if told so by thread starter:

Sure, but if you go a couple of pages back in the thread, like from page 10, you'll see that there is a challenge to solve in order to get in, people dont read, they only look at the first post and then click "New Reply" obviously.

We only want members who can READ, and who can at least like figure out very simple things :) Our main communication is on IRC so if you cant solve the challenge or you cant use IRC protocol, then perhaps other hobbies should be considered ;)

TheFallenShallNeverRise - July 4, 2016, 7:27 pm

Desired Name: unodetres

Age: old enough but not mature

Hobbies: Reading, thinking, imagining

Why do you want to join this group?: Mostly because I have tried to learn on my own and I'll be honest it's hard for me to learn alone. I can't stay on track. I feel as if I were to join a group I'd be able to keep my focus and try to learn so I can have an equal input to the goal as everyone else and not be left behind.

What do you specialize in?: Non-linear thinking, I don't take things head on a lot I'd rather see it from all angles and go with the lesser used way even if it's harder or never been done.

What Coding Language do you know?: I honestly don't know any, but I feel as if by joining this group would push me to learn so I'm not left behind.

Meh nevermind about that...

THEMANSF - July 7, 2016, 4:10 am

Hey everyone,

Sorry for the wait, but I will be accepting new members in the coming days. Please reply to PMs asap or your invite will be cancelled. I don't want any new members that aren't willing to contribute and work with the group and if so, you can go fuck off somewhere. Also if you're planning to be inactive in this group, you'll have a very short time spent in TIN.

Thanks,
THEMANSF

ViniPuxx - October 16, 2016, 5:51 am

The group IS alive but original post was by the original leader who left us, and no hf moderators have killed the thread yet.. we only allow members who can read, there are challenges in this thread that will let you join the group, so its no use contacting OP or posting an application with your cool nick and skills here..

But people dont read, they see the original post and just start typing their application..

We dont want people who cant read, and no people who cant convert simple ascii codes, no people who cant use IRC protocol.. Solve challenge and come talk to us, thats it!

And I am sure that next post after I posted this, will be another application from somebody who didnt read and doesnt know that you have to solve a challenge from the thread to join.. that sad

Age:17

Hobbies:

Programming, learn something about neural networks, play computer games

Why do you want to join this group?:

I think the idea of a hacking / programming group is not bad and I've been looking for people for a long time with whom I can interact, learn from, as well as pass on knowledge / skills. Thus, I find this group as appropriate.

What do you specialize in?:

I'm good with Linux / Windows environments and I already have knowledge in C # that make me program neural networks.

What Coding Language do you know?: C#, C++, the basic knowledge of HTML and a bit PHP, but I am still working to maximize my repertoire of programming languages.

Best regards

Hello guys,

Today I'll be starting a beginner programming/hacking group, called TIN. Our plans as a group is to improve programming skills and the understanding of hacking as a collective. How? you may ask, We plan on using the "Choose and work" method. Which means we will choose a project to work on as a group, but the project will have to be within our group's criteria. Our long term goal is we want to build a programming/hacking group that will have chemistry and equal knowledge to complete future projects with few guidelines.

The group is open to any user, if you want to join please answer these questions. If selected you will receive further instructions through a PM.
