I'm currently at 35 minutes in the video as I'm currently typing this. I must say I had my doubts about your claims initially, but you've pretty much made your point and it's quite logical.

You say how you want you post to Kik websites. Do the whores chat to the customers to convince them to is it a bot? I don't think I caught on to who did what at specific point in the video.

Anarchist07 - May 16, 2016, 3:56 am

Damn an almost hour long video about your eWhoring strategy, pretty crazy haha.

My models take over from there.

why is the password not working for me...did u change the password op?

SIM-2998667 - May 16, 2016, 6:18 am

Very nice method and video op. You're a genius

akaswizz - May 16, 2016, 6:21 am

Why did u made this whole thing?..now is exposed :) ..anyway it can't be saturated :)). I`m doin the same thing for over 2 years, same principe with paypal and all, the only thing is different is that i don`t hire models, i spam. Setup and kik autoresponder and just sending traffic to it. Using just one pack, but i want to scale it up in the summer when i`ll have some free time. Anyway, great works. U`r conversion rate i think is higher than mine.

eWhoreLeader - May 16, 2016, 9:15 am

Thanks for support all.

I am not concerned about the method being stolen or exposed. Because if you actually implement this entire process like I did and go through all that work, you deserve to have it too.

I just really wanted to show the community that there are there ways to eWhore. And a few of my other posts I was called a scammer when I introduced this idea. This video was kind of like my redemption, it it's informative :)

Did you watch the video?

The concept of "live pics" is irrelevant. All pics become verification proof. Of course they're live! ?

Anyone can do this method. The question is, are they willing to put in the hard work and time to cover their tracks and scale it properly and let it grow organically?

With my experience on HF, most are in it for the quick buck. This will not fit those mentalities.

It's called Auto Reply Manager. It's an Outlook add-in.

@ TheTwins510 The method i`m using to autorespond my messages i won`t share it, sorry.

eWhoreLeader - May 17, 2016, 11:58 am

Just FYI to all. Kik is not the best method.

My first year of eWhoring I never used Kik. I only would send pics from my eWhore email. I had good verification pics though. I would suggest verifications like, "What's your name? I'll write it down for you".

Then I would get sharpie and write their name big on computer paper and take a picture of it with my iPhone. Then email it to myself and open it in Photoshop and blend the two pics together.

ewhore: "Hang on lemme find a piece of paper and a sharpie. I have some in a pile here. I'll just write over it"

Guy: "Ok my name is Tyler"

eWhore: "Okie babes. Whats your email?"

Password was probably not working for you , coz you were copy->pasting , instead of typing it. It happened to me as well I'm on linux system, copy paste gives error, typing it manually lets you in.

OP no matter what yours atrategy would be the end goal is always same i.e. MONEY.

"I g0t money on my mind", so as continously e-whoring for a week now.

I've seen a few other of your threads and to be honest to me personally it seems like a waste of resources right-there, Here you have actual women doing the work and only manage to average \$700 a week? I mean sure \$100/day isn't bad but when you have workers it seems more like a waste to me; best of luck either way.

The more they model, the more they earn every week. It's called scaling.

Where are you posting them? Also, be careful with your language on CL posts. Don't make your posts/ads for gigs very aggressively R/X rated. Make them mild.

when you direct them to your website, then use all the necessary language about the position.

Hope that helps.

I don't really stream anything because the models do most of the legwork, while I maintain the administrative aspects (payments, analytics, traffic, etc).

totalwarriorino - August 1, 2016, 1:28 pm

Jesus Christ this is unreal. I am impressed. So you probably set up some script that sends the client's username to the model (once they submit payment etc) for them to add themselves so they are not getting spammed by freeloaders, yeah? I should probably learn to build websites now.

Precisely! After the payment has been submitted, the rest is on autopilot. I just check in a few times a day to make sure there are no hiccups.
