Thread: [Who can crypt my server pls](#)

amchagar - May 17, 2016, 8:20 am

Hi

i'am looking someone to crypt my dark comet server for free (i'am not looking a 100% fud .)

scan and run time fun + MINIMAL DEPENDANCE

(i'am not a noob! I know about virustotal and my 'hacking technique' is 99% safe)

You claim that youre not a noob, yet you use darkcomet.

How ironic.

You claim that youre not a noob, yet you use darkcomet.

=> I'am not a programmer or a hacker ..i'am a ...don't remember the name of people who use tools like darkcomet

Dark comet is THE BEST rat ever!! because its created by a french surrender trololol
