Thread: [\[FREE\] Tools Collection v1 \(BOT & Dos & Spammer etc.\)](#)

SIM-3063187 - May 18, 2016, 10:52 am

Hello guys.

I made a new program called Tools Collection v1.

Q: Why did you make it?

A: I wanted these tools my self but those free tools on the internet were full of viruses. I also wanted to improve my programming skills.

After sharing it with my friends I thought why not share it with HF.

---What does it contain?---

It contains:

- A YouTube Bot (Not comprehensive)
- A Dos tool (Ping of Death) -- Use it together with other ddos tools to actually down a website and/or with multiple pc's.
- A Web Spammer (Can help down a website.)
- A Spammer (Spam your friends on 4 modes.)
- Website's IP Adress grabber.

As I said, Use the Dos tools together with other Ddos tools and/or with multiple pc's to be succesful with downing.

---- Download link & Virus scan. ----

Download: <http://www.mediafire.com/download/a30w5s4r1r33f4v/Tools+Collection+v1.rar>

Virus scan:

Downloading now will edit once opened

Does what it should do
