Grammar - [10/10]

I didnt manage to find any grammatical mistakes in the method! Im very impressed.

Method - [10/10]

I have not seen this method before, it's explained very well so everybody will understand it and works perfectly!

Layout - [10/10]

The layout of this method is easy to understand, and is crafted beautifully, allowing it easy to read and understand even for beginners.

All in one - [10/10]

The seller contacted me to write a vouch, this is my unbiased review.

Readability- The eBook is easy to understand, no grammatical errors or problems of that sort.

Method - The method itself does seem to be pretty simple enough to perform, however I would not classify this as a highly original method. It certainly can definitely work if you are willing to put in the effort. I would say this method is more of grey hat than anything else. Personally I think I'll try this method out if I have some free time to do it.

Layout - The eBook itself is quite short. I understand it's a method that doesn't need quite a lot of detail to perform but I would have like to see the seller elaborate a bit more and explore the intricacies of the method. Maybe that's just me.

I thought I replied already, but I got this method. He gave me a vouch copy.

His grammar is fine, The organization is awesome but the method itself is already online. Free to the public

EDIT:

I was PM'ed by OP saying that I could get a warning level for "Revealing his method" I just dont think he should be selling a free method
