After receiving the product it want even FUD and he told me to wait for the new update, the new update came out and still its not FUD but he is saying its no FUD for me only, I asked him to come over TV and show me how its FUD and he came up with the excuse that he doesn't have time to. here is the screen of out chat on his support forum and over PM's on HF.

The new update was, and still is FUD.

I told you what to do on a reply to the ticket you sumbitted.

I also told you I have been very sick, hence the delay on replies.

I am one guy dealing with over 100 customers, I am doing my best and you have the cheek to submit a scam report and deal dispute because you're too stupid to change a few things?
You sir, are a disrespectful piece of shit.

You contradicted yourself. Saying to him before he purchased, saying yes it is FUD. Then he complained, you said you would release a update on it making it FUD?
False advertising.

False advertising.

I already waited for the update and when it came out it wasnt even FUD and the best part that he claims its still FUD with the default settings but its not, he doesnt even want to show me how its FUD on teamviewr i waited long enough for him, i expected the product to be FUD as he said before purchasing

NERO - June 16, 2017, 10:35 pm

I don't agree with you, Im not trying to be a dick or anything but iv always had great experiences with the guy, His product isn't fud right now, But im sure he will update it again (Like he has many times) to once again me FUD.

I say you guys resolve your issue, How much was your licence? \$70, \$90 or \$150?

Decide if you want the product still, If you do then ill message him aswell and see if you can come to an agreement, If not and he doesn't want to refund you then PM me,

I agree with you. I've had good experience with him in the past.

But I don't know the situation of the product for now. Is it at least UD? What is the scan result?
