Thread: [Selling used amazon gift codes jairjils =1868874](#)

Snoopyz - May 20, 2016, 3:35 am

I bought \$80 AGC from AXIS at first and plan to redeem them later which he said it is cool. After that i bought \$80 from jairjils which are the same codes he AXIS which AXIS sold me. AXIS can vouch for the whole situation.

Long story short, yeah. I bought a few codes from jairjils, and resold them to Snoopyz. Jairjils knew I wasn't going to redeem them instantly and he thought he could probably resell them then claim that it was me who claimed them when they didn't work.

I'm lucky, he tried selling me 4 \$50 codes, then I was going to resell them to OP. Luckily I was VERY suspicious, so I refunded OP, and just bought one code from jairjils and sold that one code to OP.

To make it clearer.

1. AXIS sold me \$150 agc which i did not redeem. He thought Jairjils is fishy so he refunded me \$50 agc
2. An hour later when i'm ready to redeem, i bought another \$80 from Jairjils which i redeemed. I thought all is good.
3. I tried to redeem the \$80 from AXIS but it shows up at invalid.
4. Report made

I've had some successfull exchanges with him, but he has seemed shady to me.

Hope you get this sorted out.

This dude?

<https://i.imgur.com/pgffwWV.png> That's the one. He basically sold OP the same codes as he did to me.

Yeah I don't know.

You guys have a good story. Post some proof to actually validate your statements. I don't doubt them, but you really should post some screenshots or something to confirm your statements.

Invalid.

He has been added. I don't believe you use HFAlert.

If you do use it you will see a red profile + red icon on him.
